

FAT TRUCK FT3 Wagon

Designed to go where no conventional vehicle can, the FAT TRUCK FT3 Wagon is a fully amphibious, 8 person (operator plus seven passengers) industrial utility vehicle built for extreme off-road and sensitive terrain operations.

Overview

The FAT TRUCK FT3 Wagon is engineered for industrial operations in the most challenging environments, combining full amphibious capability with ultra-low ground pressure and a powerful HATZ diesel engine. Its fully hydrostatic transmission, driven by four independent hydraulic motors, delivers smooth and precise control across wetlands, bogs, snow, mud, and open water. With capacity for up to 7 passengers and a land payload of 1300kg, it offers a practical and reliable solution for transporting personnel and materials where access is otherwise impossible. Intuitive joystick steering and microprocessor-controlled systems ensure safe, confident operation in all conditions.

Ideal for: Wetlands, peatlands, environmental projects, remote site access, utilities, and any application requiring amphibious or extreme off-road capability.

Specifications

- **Engine:** HATZ 4H50TICD, 4-cylinder, 1.95L, liquid-cooled
- **Power:** 74 hp (55 kW), 177 lb-ft torque @ 1,400 RPM
- **Transmission:** Hydrostatic with 4 hydraulic motors
- **Payload:** 1300kg on land / 1000kg on water
- **Ground Clearance:** 650 mm
- **Tyres:** FAT TRUCK® 1640 x 640 x 610 with automatic pressure control

Key Features

- Fully amphibious — operates on land and water
- Ultra-low ground pressure for sensitive and soft terrain
- Hydrostatic transmission with zero-radius turning capability
- 7 passenger capacity with ROPS-certified cab
- EPA Tier 4 Final and Euro Stage V compliant engine
