

Operated Plant Hire

Tracked Welfare Unit

Designed for remote and off-road site operations, the Eco 10x is a compact tracked welfare unit with essential on-site facilities.

Overview

The Eco 10x welfare unit provides essential site facilities in remote and difficult-to-access locations. Mounted on a tracked chassis, it offers excellent mobility while maintaining low ground pressure. Its secure steel construction ensures durability and protection on site.

Ideal for: Remote construction sites, utilities, and infrastructure projects
