Loglogic Softrak 65

Purpose-built for sensitive environments, this is a versatile, low ground pressure all-terrain vehicle.

Overview

The Loglogic Softrak 65 is purpose-built for work in environmentally sensitive and difficult terrain such as wetlands, peatlands, and uplands. With extremely low ground pressure, it minimises environmental impact while maintaining excellent mobility. Available in flatbed or personnel carrier configurations, it provides a flexible solution for transporting materials and crews safely across challenging landscapes.

Ideal for: Wetlands, environmental projects, forestry, and sensitive ground operations.
