

Operated Plant Hire

Hägglund BV206

Capable of tackling extreme environments, the Hägglund BV206 is a versatile all-terrain tracked vehicle for personnel and cargo transport.

Overview

The BV206 is a highly capable amphibious tracked vehicle designed to operate in snow, bogs, and remote terrain. With extremely low ground pressure and articulated steering, it provides unmatched mobility where conventional vehicles cannot operate. Available in multiple configurations, it can transport personnel or carry and lift equipment efficiently.

Ideal for: Remote access, utilities, emergency response, and extreme terrain operations
