

Hinowa Spider Platform 3317

Designed for high-reaching tasks in compact spaces, the Hinowa Spider Platform 3317 is a versatile tracked aerial platform.

Overview

The Hinowa 33.17 spider platform provides exceptional working height and outreach while maintaining a compact footprint for access in restricted areas. Its tracked design allows operation on uneven terrain, and multiple power options make it suitable for both indoor and outdoor use. Advanced stabilisation ensures safe working at height in challenging environments.

Ideal for: Building maintenance, tree work, and high-access industrial applications.
