

# Marpac – Endotracheal Tube Holders

*Full range of adult tapes and holders you can rely on.*

**Marpac** – *quality securement you can rely on.*

**CCMed are proud to represent Marpac, leaders in airway securement, providing security, comfort and peace of mind.**

- The range covers both short and medium-term devices, tapes and adhesive-free solutions. Some devices can even be used with patients in the prone position.
- Care teams particularly appreciate the track, that allows them to securely move the tube to avoid pressure points, without having to remove the holder.
- Produced in a purpose-built facility in the USA, conforming to all FDA, UK and EU regulations.
- All areas of the business, including design, production, inspection, packing and shipping, are done in-house. Nothing is outsourced, to help ensure consistent high quality.

## Adult 306 ET tape, with cushioned neck strap for comfort and security. Latex free.

### Available in boxes of 25 and 100pcs

The adhesive in the Marpac 306 ET tape is specially formulated to secure ET tubes, offering the best balance of grip and removal strength.

The neck slide offers quick and easy application, whilst the paper backing allows for a variety of taping methods without it sticking to your gloves.

The 306 is a great product for short-term use and your crash trolley.

## Adult 320 adjustable ET tube holder. Adhesive free with a track and head strap to help relieve pressure build-up.

### Available in boxes of 10 and 100pcs

The Marpac 320 is an adult, adjustable ET tube holder that is secure, skin friendly and easy to adjust. There is no adhesive on the patient's face, allowing the skin to be checked and cleaned underneath the device without the need to remove it.

The securing head strap (included in the kit) can be adjusted to lift the device and help prevent pressure build-up. As the device is well secured, tube repositioning can (depending on local protocols) be carried out by a single member of the team.

The product is also available as the 321, with larger neck and head straps, designed for burns patients.

## Adult 340 E-Z Grab<sup>®</sup>, Marpac's latest ET holder. Very quick and easy to use.

### Available in boxes of 10pcs

The Marpac E-Z Grab has several features that make it very popular with clinical teams. The soft foam pad (under all plastic sections) along with the hydrocolloid adhesive (carefully placed above the mid-line only), holds the device in place and is very skin friendly. The buckle quickly secures the tube and allows it to be safely moved along the raised track, helping to prevent pressure build-up. Depending on local protocols, the repositioning of the tube can be carried out by a single member of the team.

The raised track helps prevent pressure on the upper lip, even for edentulous patients, whilst keeping secretions away from the locking mechanism. This device is quickly become the preferred choice for short to medium-term use.

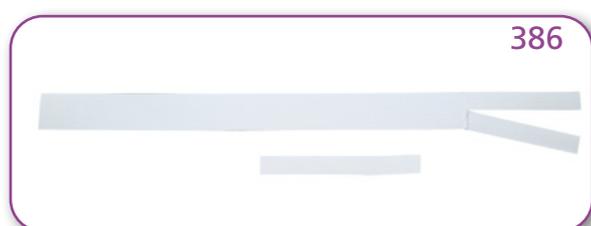

## Also available – the Marpac 386 and 389: Preformed, paper-backed, latex-free ET tape.

### Available in boxes of 100pcs

The skin-friendly adhesive in the Marpac 386 and 389 is specially formulated to secure tubes to the patient's skin, under exposure to various liquids e.g. sweat, saliva etc.

The 386 is 1" X 14", paper-backed and scored on one end for easy tearing.

The 389 is 1" X 8" in size and has a crack-and-peel paper backing.

**CCMed**  
Quality medical devices since 1966

CCMed UK has been supplying quality medical devices to the NHS, private hospitals and MoD for over 50 years. Our core business is Airway Management, Ossiculoplasty, Head & Neck Surgery and Xerostomia (Dry Mouth) but we have recently extended this to include some other Critical Care devices, including Endotracheal Tube Holders and Anti-Disconnect devices thanks to our close association with Marpac Inc.

CCMed Ltd is passionate about improving the quality of life of patients via the innovative products we represent. We also work closely with healthcare professionals and manufacturers alike to help solve the unmet clinical needs of the NHS, private hospitals and MoD.
