

MyAgData®

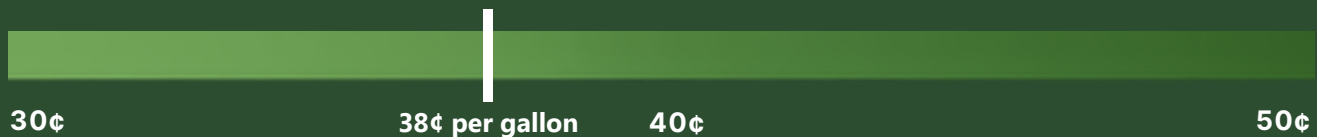

Streamline Your 45Z Reporting

The data backbone, from field to filing.

Section 45Z ties every dollar of your Clean Fuel Production Credit to a defensible carbon intensity score - **and that score is only as strong as the field-level data behind it.** MyAgData gives growers, program administrators, and verifiers one shared system to collect, calculate, and file that data without duplicate work or gaps in the record. The result: credits you can stand behind, and documentation that holds up under audit.

ESTIMATE YOUR CARBON SCORE

illustrative - varies by CI score and pathway

Grower-first entry

A simple platform growers actually use to enter field-level data.

Scale tickets to progress

Scale tickets convert directly into real-time progress tracking.

CI score visability

See every grower's CI score and how it affects your credit.

Model scenarios

Run incentive and credit-sharing scenarios with growers.

Filing-ready output

Download completed FD-CIC and 45Z-GREET spreadsheets.

Audit-ready package

Complete documentation package, plus as-needed access for verifiers.

One data collection system for your 45Z process

From growers and program administrators to merchandisers and verifiers
