

Data Risk Assessment

Know exactly where you stand

Don't let blindspots surprise you. Work with our experts to evaluate your organization's data strategy and cybersecurity maturity so you can proactively discover and resolve security posture gaps and get ahead of the game.

Understand the risk

Data is now the fastest-growing attack surface and the consequences of blind spots can be damaging. Let our experts help you understand your exposure, boost preventive controls and processes, and see the path forward.

Get the full picture

Evaluate your overall data risk and cybersecurity maturity for a comprehensive view of your organization.

Identify gaps

Assess your data management and security practices to discover where to focus improvements.

Know what to do next

Leverage over 30 critical controls, along with Cyera DSPM, OSINT, and Dark Web intelligence to create tailored actionable insights for next steps.

Strengthen your security posture

Review previous data breaches and leaks to identify compromised credentials and other exposure details and strengthen your overall posture.

Full-scope data risk evaluation

Cyera experts will work with you to examine and evaluate your data strategy and cybersecurity maturity. The Data Risk Assessment produces actionable deliverables designed to support immediate decision-making, drive security improvements, and enable ongoing program management.

Complete Data Inventory

Every data store - structured, unstructured, shadow, and forgotten - discovered and classified by Cyera's platform.

- Platform-powered discovery across all clouds

Risk Prioritization Report

Highest-risk findings ranked by severity and blast radius, mapped to GDPR, HIPAA, PCI-DSS, and SOC 2 with remediation owners.

- Automated framework mapping, zero manual tagging

Executive Readout Deck

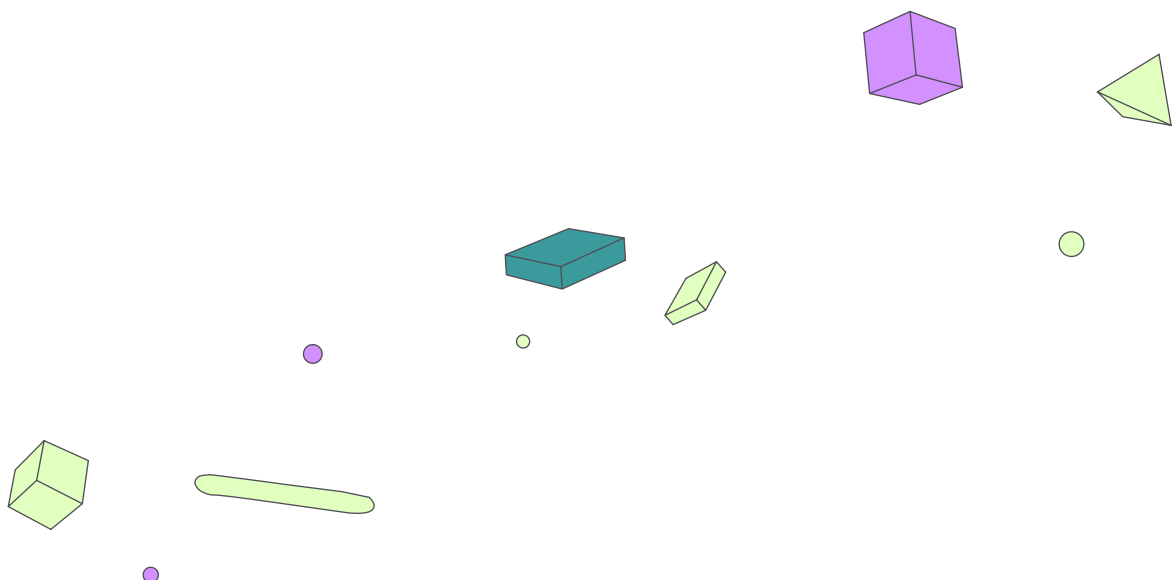

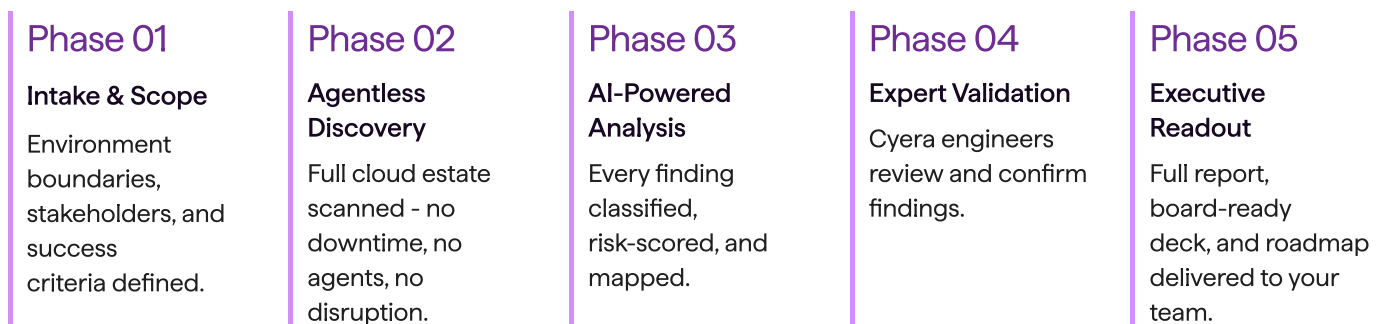

Board- and CISO-ready presentation of your data risk posture, peer benchmarking, and a prioritized 90-day action plan.

- Peer benchmarked by industry and size

Access Exposure Analysis	31-Domain Control Assessment	Investment Roadmap
Exactly who can reach your most sensitive data - internal users, service accounts, third parties - and where permissions are misaligned. • Identity-aware analysis, not just file scanning	Data security controls evaluated against 31 best-practice domains, revealing coverage gaps and your maturity score. • Cyera's proprietary control framework	A prioritized technology and process roadmap tying DRA findings to quantified business risk - built to justify budget. • Designed to fund a program, not check boxes

Five phases. Zero disruption to your business

The Data Risk Assessment is the fastest path to a prioritized data security program. This engagement takes four to six weeks and consists of 5 phases.
