

DISCRIPTION

IDEAL BIKE LIFE engine oil is a high-quality lubricant designed for two-stroke motorcycle engines operating under moderate service conditions. It provides reliable lubrication, helps reduce engine wear, and ensures smoother engine performance for everyday riding applications.

IDEAL BIKE LIFE is formulated with selected base oils and balanced additive technology to provide dependable lubrication for air-cooled two-stroke engines. The formulation helps reduce piston deposits, protects engine components from wear, and maintains good engine cleanliness during operation. This lubricant ensures efficient lubrication during fuel-oil mixing and supports stable engine performance under normal operating conditions. It helps minimize exhaust deposits and provides adequate protection against rust and corrosion, contributing to longer engine life and reliable operation.

APPLICATION

IDEAL BIKE LIFE is recommended for use in

- Small two-stroke motorcycles and scooters
- Mopeds and light-duty two-stroke engines
- Air-cooled two-stroke engines
- Fuel premix lubrication systems
- Small engines where API TA performance level is specified

BENEFITS

- Provides reliable lubrication for two-stroke engines
- Helps reduce engine wear and scuffing
- Minimizes piston and exhaust port deposits
- Maintains engine cleanliness
- Good fuel mixing properties
- Protects engine parts from rust and corrosion
- Supports smooth engine operation

PRODUCT DATA SHEET

Performance

API TA

Packaging: 1Q,1L,4Q, 4L,5Q, 5L, 18L, 20L, 25L, Drums, IBC.

Specification

Test Parameter	Units	Test Limits	Test Method
Appearance	-	Clear & Bright	Visual
Density @ 15°C	g/cm ³	0.866	ASTM D-4052
Viscosity @ 40°C	cSt	50 – 70	ASTM D-445
Viscosity @ 100°C	cSt	7 – 9	ASTM D-445
Viscosity Index, min.	-	115	ASTM D- 2270
Flash Point min.	°C	110	ASTM D-92
Pour Point, max.	°C	-18	ASTM D-97
Code	-	301	-
