

GALA

LED Strip Light

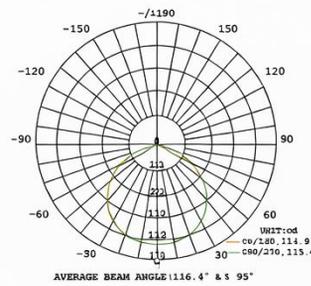

GALA is a versatile LED strip lighting solution designed for functional and decorative linear illumination where reliability and flexibility are essential. Engineered for stable performance on 24V DC systems, it provides consistent light output with good color uniformity and controlled power consumption. Its compact form factor and precise cut increments allow easy adaptation to coves, shelves, profiles, and concealed architectural details. GALA is ideal for residential and commercial applications that require clean, even lighting without the higher density or premium output of the PRO series, offering a practical balance between performance, efficiency, and installation ease.
