

GALA PRO 180

LED Strip Light

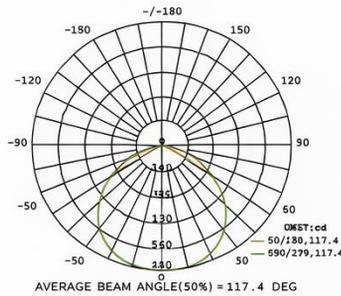

GALA PRO 180 is a high-density LED strip light engineered for smooth, continuous illumination and excellent color consistency. With 180 LEDs per meter, it delivers uniform light output with minimal dotting, making it ideal for architectural details, coves, shelves, and linear accents. Built on a copper PCB with gold wire bonding, GALA PRO 180 ensures efficient heat dissipation, long service life, and stable performance. Designed for 24V systems, it supports precise cutting and flexible installation for both residential and commercial applications where clean, refined light is required.

All LEDs use copper base and gold wire which provide good heat dispersion, long life span and low luminous decay.
