BRIDGE SAW

## THE FUTURE OF STONE AUTOMATION™

### ELITE ENGINEERING

The semi-automatic bridge saw features robust steel legs, broad base plates, a hydraulic tilt table, advanced operating systems, and a sturdy torsion bridge design.

### CONTINUOUS CUTTING

Saves Time, Space, and Hassle. No programming skills needed, and wireless remote control with auto cuts program.

### ROBUST BLADE MOTOR

25HP, 16"-20" Blade, Maximizing Efficiency for High-Production Fabricators. Automated precision for complex shapes, reducing downtime.

### TLTING TABLE

Measuring at 126"x79", the Secure Turntable is wobble-free and locks at 45° and 90°. Advanced features include automatic water valve, remote control, and cut marking laser.
