

Embedded Module HF

M890

PRODUCT DESCRIPTION

The iDTRONIC HF | NFC Embedded Module M890 is a high performance reader series. Thanks to its tiny size and single-face laying components layout, it allows for embedding in various applications and devices.

With its cutting edge microcontroller and latest HF transceiver technology, the reader series allows users to read and write almost any 13.56 MHz transponders. 5 different configurations are available which support the common RFID standards such as ISO 14443A/B (T=CL), ISO 14443-4, ISO 15693 and ISO 18092 / ECMA-340 (NFC).

The HF | NFC Embedded Module M890 features one external antenna port. iDTRONIC Professional RFID offers a wide choice of antennas suitable for any purpose. It achieves reading ranges of up to 10 cm (depending on type of transponder).

The HF | NFC Embedded Module M890 is available with TTL, USB VCP, USB HID, RS232/485 and PC/SC interface. In low power mode, the M890 consumes less than 1 mA.

iDTRONIC's hardware comes with a useful SDK for the development of controller, Linux or Windows based applications. Beside the documentation, command protocols and source codes, the SDK includes a Windows based demo application with full functionality over all supported HF RFID standards.
