

The low-staff studio

ID INFO 9000

MIdentify members contactlessly. Automatically verify access permissions. Make day-to-day studio operations more efficient.

Contactless Check-in

Facial recognition in less than a second—for quick access.

Three Access Options

Facial recognition, QR codes, and RFID all combined in a single terminal.

Protection Against Card Sharing

Optional facial recognition reduces the misuse of member accounts.

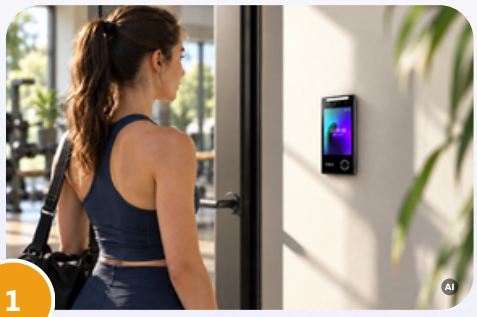

Easy Integration

Integration with administrative systems such as Magicline and Centercom.

Secure access. Less time spent.

Members check in on their own. The ID INFO 9000 verifies access through the connected studio management system, thereby reducing unauthorized access and taking some of the pressure off the front desk.

1

One glance is all it takes
Contactless facial recognition in less than a second—no card, wristband, or smartphone required.

2

Use a QR code or RFID
Three access options in one device: Facial recognition, QR code, and RFID.

3

Protecting Member Access
Optional facial recognition for QR codes and RFID helps prevent the unauthorized sharing of member access.

What Matters Most in Studio Operations.

Reduce the workload at reception.
Fewer manual checks at the front desk.

Managing rush hour.
Quick identification during periods of high member traffic.

Offer alternatives.
Check-in is also possible via QR code or RFID.

Clearly assign access.
Additional facial recognition ensures greater security.
