

7.5 HP | 24 CFM Cube Air System

Pressure Lubricated Reciprocating Compressor

24 CFM @ 175 PSI

- Features
- Heavy-duty two-stage pressure lubricated pump
 - Centrifugal unloader
 - Disc and spring valves
 - Discharge cooling manifold
 - Easy open inline check valve
 - Easy service belt guard
 - Easy to read oil sight glass
 - Easy service reciprocating pump platform
 - Extended oil drain tube
 - Industrial grade electric drive motor
 - Inner stage cooler
 - Minimal floor space foot print
 - Multiplexing capability
 - Rigid steel frame construction
 - Self tensioning electric motor base

- Optional Package Features
- Class 1 Div 2 drive motor
 - Coalescing filtration
 - Desiccant air dryer
 - Electronic automatic tank drain kit (shipped loose for installation on site)
Kit includes: drain, ¼ pipe street 90 elbow, ¼ pipe 6” nipple
 - Enrollment in factory extended service program
 - Enrollment in factory extended warranty plan
 - Multiplex control panel
 - NEMA 4X electrical components
 - NEMA 7 electrical components
 - Particulate filtration
 - Quick Install Kit Includes:
8 feet electrical cord with plug, 6 feet compressor to tank air line JIC fittings, 6 feet tank to facility air line JIC fittings
 - Reciprocating Pump Enclosure for noise reduction
 - Refrigerated air dryer
 - 30, 60, 80, 120 gallon storage tank (200 PSI MWP, ASME, CRN)

- Elite Features
- All basic compressor features
 - Belt guard mounted air after cooler
 - Low oil monitor
 - High-temp stainless steel flex discharge line
 - Vibration isolation mounting pads
 - Freight pre-paid in standard freight area

Model	HP	CFM @ 125 PSI	CFM @ 175 PSI	Voltage	L×W×H	Weight
Q71-PL	7.5	25	24	208-230/1	26×22×40	500
Q73-PL	7.5	25	24	208-230-480/3	26×22×40	500
