

## Capabilities Statement

Turning innovation into application to empower mission success. GXM Technologies delivers agile, secure, and interoperable solutions that solve complex challenges for defense, federal, and enterprise clients, ensuring readiness, resilience, and operational excellence.

Service-Disabled Veteran-Owned Small Business

### Awarded Domains & Functional Areas as a Small Business

- Research and Development (R&D)
- Advisory and Management and Advisory (M&A)
- Coming soon! Technical and Engineering

### Certifications

- CMMC Level 2 and CMMI Level 3 Development

### Competencies

Specializing in applied innovation for government and defense sectors. As an adaptable and highly responsive partner, GXM leverages deep expertise in:

- Core Technology Services include software engineering, systems integration and modernization, rapid prototyping, and cloud solutions
- Innovation and investment. We design and execute innovation programs that connect emerging technology companies to accelerate the identification, development, and transition of dual-use technologies. Our investment initiatives foster direct engagement between founders, limited partners, and acquisition stakeholders, supporting the commercialization and scaling of critical technologies aligned with national priorities.
