Video Surveillance-as-a-Service (VSaaS) | AI Powered

SHAURRYA Teleservices

Video Surveillance-as-a-Service (VSaaS) provides advanced security monitoring through high-definition cameras, real-time remote access, motion detection alerts, & cloud-based recording, ensuring continuous protection of homes, offices, & public spaces while enhancing safety, deterring unauthorized activities, supporting evidence collection, & offering peace of mind with reliable, smart, & customizable surveillance solutions.

- 24x7 Technical Support
- Event Monitoring & Notification
- Hybrid
- Web Interface
- Modes of Record

- Threat Detection
- Event Detection
- ONVIF Compliant
- Distribution Service SMS/Email Message
- Up to 4K Recording
- Logically Separated

Cloud Video Surveillance Solution

- Manufacturing
- Civil Defence Municipality
- Airports Malls
- Traffic Signals Road Buses
- Banking Sector Branches ATMs
- Hospital
- Hospitals Clinics Ambulance

Top 10 Reasons to Video Surveillance as a Service (VSaaS)

Proactive Threat Detection

AI-powered VSaaS enables "real-time analytics" that identify threats (intrusions, fights, thefts, fire, etc.) before they escalate, ensuring "preventive action" rather than post-incident review.

Cloud-First, No Heavy Infrastructure

VSaaS removes the need for on-premises DVR/NVR setups and high local storage costs.
AI models process video in the cloud or at the edge, offering "scalable, secure, and maintenance-free operations".

AI Analytics that Add Business Value

Beyond security, AI transforms video data into "business intelligence":
- Footfall & heatmap analytics for retail,
- Workforce compliance for manufacturing,
- Patient safety tracking in healthcare.

Real-Time Alerts and Automated Response

Instant notifications via mobile app, email, or dashboard when anomalies occur — no need for constant human monitoring.

Centralized Monitoring Across Locations

AI VSaaS allows "multi-site visibility" from a single dashboard — perfect for distributed enterprises (retail chains, warehouses, or campuses).

AI-Powered Search & Forensics

Forget scrubbing through hours of footage. With AI tagging (faces, vehicles, colors, events), users can instantly "search incidents by keyword or object", reducing investigation time from hours to seconds.

Seamless Scalability & Flexibility

As operations grow, cameras and analytics modules can be "added or removed remotely".
No reconfiguration or hardware overhaul required — perfect for enterprises and startups alike.

Enhanced Compliance & Audit Readiness

Many industries (banking, healthcare, manufacturing) need 24x7 monitoring compliance.
AI-based VSaaS automatically archives events, flags policy violations, & maintains secure logs.

Continuous AI Improvement (Self-Learning Models)

Cloud-based AI continuously retrains on new data making the system smarter over time.
This ensures higher accuracy & lower false alarms without manual updates.

Lower Total Cost of Ownership (TCO)

By combining AI analytics, cloud storage, and automation, VSaaS reduces:
Hardware maintenance, IT manpower cost, Investigation overhead, Physical guard dependency.

Cloud Video Analytics Platform
Powered by *AI Powered*

Affordable All-In-One Solution that Includes Video Management System, Intelligent Cloud Analytics & Cloud Storage, Compatible With All Camera Brands & Free of Additional Hardware.

Works with leading NVR, DVR & IP cameras (ONVIF Compliant)

SAMSUNG **logitech G** **Honeywell** **BOSCH** **LINKSYS**

TOSHIBA **CP PLUS** **alhua** TECHNOLOGY **MATRIX**

Features

- Compatible with Any Camera
- Powerful Cloud Analytics
- Plug & Play Setup
- Alarm Monitoring App
- Ideal for Multi-Site & Multi Brand Projects
- True Cloud Security & Reliability
- Multi-Level Delegated Administration
- Low Latency, Low Bandwidth

AI Powered Cloud Aanalytics

- Object Detection
- Hard Hat (PPE) Detection
- Long Term Timelapse
- Recording
- People Counting
- Heat Maps
- Facial Recognition

- Free Clip Storage
- Broadcasting Widget
- Area & Color Search
- Fire & Smoke Detection
- Share Cameras and Clips
- Webhooks, API, React JS

Secure your Business with a Holistic Security Platform.

Dynamic business landscape, organizations are continually seeking innovative solutions to enhance operational efficiency & streamline complex workflows.

Features

Unified View

Facilitate seamless integration & coordination of diverse security components in a single view.

Save on Costs

No additional investment in CAPEX. Save on costs without making changes in existing infrastructure.

Versatile Integrations

Effortlessly manage diverse devices like fire alarms, door & shutter sensors, maglocks, speakers, hooters & more.

Benefits

Centralized Control

Integrated Security

Seamless Connectivity

What sets us apart?

3D Advantage ensures close looping the cases post proper verification of the facts with all the proofs to ensure complete and closure of any ticket. All recordings backed up on cloud.

Prompt Action on Incidents
Get live notifications for quick actions based on SOP & WFM, ensuring timely responses.

Eliminate Manual Errors
Reduce human errors & fatigue in traditional methods, streamlining processes.

Predefined SOP Integration
Enforce standardized processes for consistent, high-quality operations.

Reduce Manpower Costs
Optimize scheduling to reduce overstaffing & minimize labor costs.

Workflow Management
Optimize & adapt workflows in real-time for better productivity.

40+ Advanced AI & ML Modules
Custom AI & ML solutions to address unique challenges & opportunities.

AI & FR
Proactively assess vulnerabilities using POI, VOL, LPR & face recognition.

Shaurrya DTS Differentiators

Manage security video effortlessly with a scalable, cloud-native platform.

Cloud-Based Video Management System

Monitor all sites and devices from a single, streamlined interface.

Unified Control Dashboard

Automatically store footage in the cloud for reliable, on-demand access.

Secure Cloud Backup

Seamlessly manage & integrate cameras of different manufacturers.

Multi-Brand Device Support

Get instant alerts & live status of all connected devices – no guesswork.

Real-Time Device Health Monitoring

Unlock intelligent insights across operations, safety & security workflows.

Advanced AI Analytics

Streamline processes and responses with AI-driven action paths.

Intelligent Workflow Automation

Secure, full-feature access anytime, anywhere via mobile app or any web browser.

Access Anywhere

Transforming Surveillance with AI

Business Efficiency

Unlock business-critical insights from your existing cameras with AI-driven intelligence

- People Counting
- Missing Staff
- Queue Management
- Heatmap

Safety & Hazard Control

Enhance workplace safety with real-time hazard detection & automated alerts.

- PPE/Safety Kit Detection
- Smoke & Fire Detection

Investigation

Accelerate investigations with actionable insights from AI-powered data analysis.

- Person of Interest
- Vehicle of Interest
- Number Plate Recognition
- Face Recognition

Powered by Shaurrya DTS

Security

Proactively detect, deter & respond to threats with intelligent surveillance.

- Intrusion Detection
- Line Crossing
- Double Line Crossing
- Loitering
- Over Crowding

Agentic AI

Agentic AI that continuously learns, adapts in real time, & makes autonomous, context-aware decisions.

- Eliminate the need for predefined rules or manual intervention.
- Evolves with every interaction, enabling systems to think, reason, and respond intelligently to complex & dynamic scenarios.
- Empower your infrastructure with self-learning, autonomous AI.

Vision AI

Train & deploy custom video AI models built on your own data to enable tailored detection, tracking & analytics specific to your environment, use case & operational needs.

- Gain precise insights and performance far beyond off-the-shelf solutions.
- Transform visual data into intelligence with custom AI models trained for your own dataset.Transform visual data into intelligence with custom AI models trained for your own dataset.
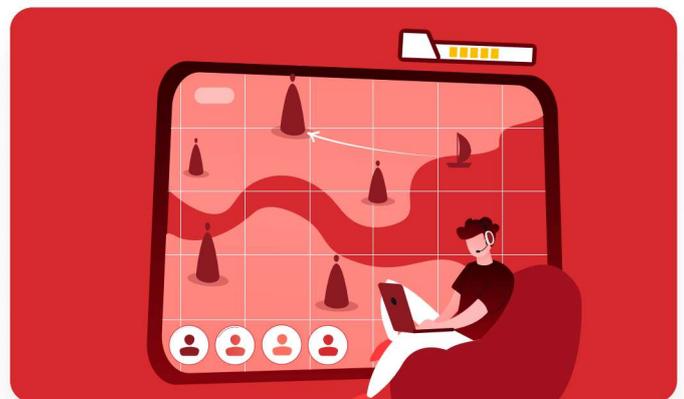

Secure & Scalable Edge Architecture

SHAURRYA Teleservices

Edge platform has been implemented in the security, retail & transportation industries. Our technology sit on existing infrastructure (HW & network), by adding edge AI (edge , on premise or cloud) we can connect existing cameras, access control, NVR/DVR, this allow us to monitor network/devices, recording & storage & run video analytics.

OTA Service

Vision Service

Console Service

Monitoring Service

End Point Service (Access Control)
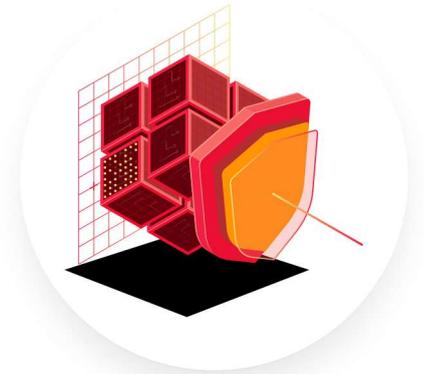

AI Container Manager Service

Assaults	Hands up	Hooded	Gender / Age	Lying Down	Loitering
Social Distance	Use of Masks	People Counter	Face Detection	Body Temperature	Density Analytics
Flow Analytics	ANPR (AB-CD-12)	Speed Change	People Fighting	Fire Detection Down	Smoke Detection
Parking Monitoring	Color and Type	Intrusion Detection	Perimeter Security		

AnyConnect: Gateway (REST API)

The most advanced platform for AI in Cameras

Smart Connectivity & Networking
Connect data to camera using RTP/RTSP/HTTP/TCP protocols

IoT Integration
MQTT-based IP & Industrial Equipment Connectivity Protocols

Resilience
Hybrid solution that extracts the potential of using edge & cloud hybrid architecture

Security
Encrypted & secure message processes between Edge devices, as well as in their communication with the Cloud platform.

Analytics & AI
VSaaS simplifies the implementation of neural network models capable of detecting all kinds of objects & patterns on Edge devices with our artificial intelligence applications

Remote Management (FOTA)
Allows administrators to send configurations, updates, patches, etc. to Edge devices from a cloud-web app

Video Surveillance-as-a-Service Use Cases

Manufacturing Sector

Video Surveillance as a Service (VSaaS) is a cloud-based security solution that enables manufacturers to monitor production, people, assets & facilities in real time with centralized control, AI analytics & remote access.

- ✅ Worker Safety & Compliance Monitoring
- ✅ Production Line Monitoring & Optimization
- ✅ Asset & Inventory Protection
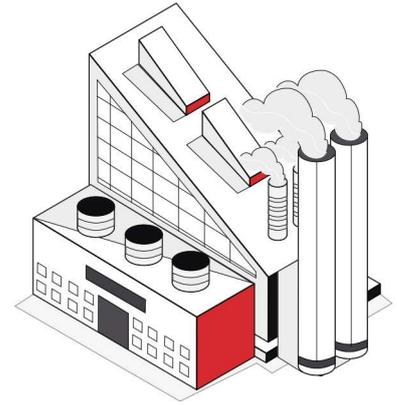

Hospital Sector

Video Surveillance as a Service (VSaaS) is a cloud-based video monitoring solution that helps hospitals enhance patient safety, staff security, asset protection & operational efficiency through real-time & recorded surveillance.

- ✅ Patient Safety & Monitoring
- ✅ Staff Safety & Workplace Security
- ✅ Access Control & Restricted Area Monitoring
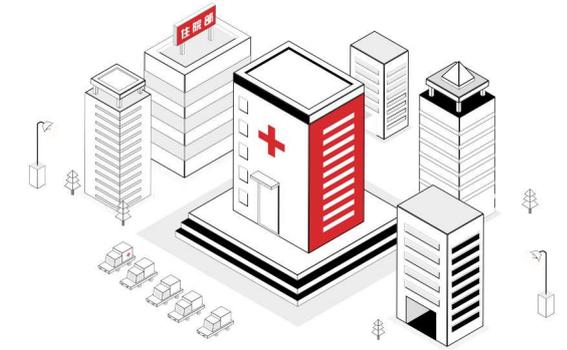

Education Sector

Video Surveillance as a Service (VSaaS) is a cloud-based video monitoring solution that helps educational institutions ensure campus safety, student security & operational transparency through real-time & recorded surveillance.

- ✅ Campus Security & Intrusion Prevention
- ✅ Student Safety & Behavior Monitoring
- ✅ Classroom & Examination Monitoring
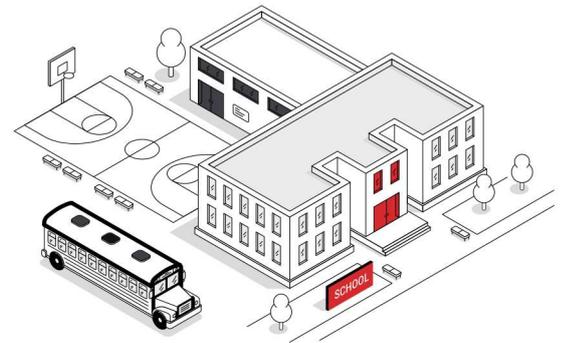

Banking Sector

Video Surveillance as a Service (VSaaS) is a cloud-based security solution that enables banks to monitor branches, ATMs, staff & customers in real time, enhancing security, compliance & operational efficiency.

- ✅ Branch Security & Intrusion Detection
- ✅ ATM & Self-Service Area Monitoring
- ✅ Cash Handling & Teller Operations Monitoring
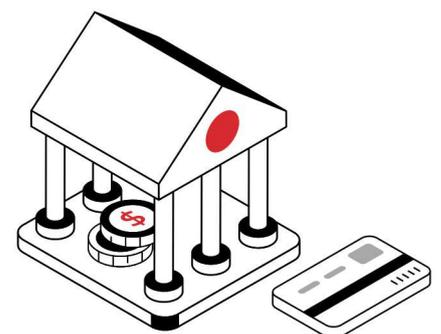

Video Surveillance-as-a-Service Use Cases

Retail Sector

Video Surveillance as a Service (VSaaS) is a cloud-based security solution that helps retailers monitor stores, staff, inventory & customer activity in real time, improving security, operational efficiency & customer experience.

- ✅ Provides irrefutable evidence for claims or disputes.
- ✅ Reduces liability & legal costs.
- ✅ Supports transparent collaboration among stakeholders.

Government Sector

Video Surveillance as a Service (VSaaS) is a cloud-based monitoring solution that helps government offices, public infrastructure & facilities enhance security, operational efficiency, and citizen safety through real-time & recorded surveillance.

- ✅ Public Safety & City Surveillance
- ✅ Traffic Monitoring & Smart Mobility
- ✅ Critical Infrastructure & Asset Protection
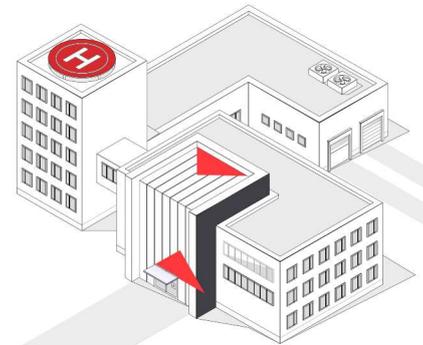

Public Safety Sector

Video Surveillance as a Service (VSaaS) is a cloud-based solution that enables real-time monitoring, threat detection & incident management to enhance public safety in cities, communities & critical areas.

- ✅ Crime Prevention & Real-Time Area Monitoring
- ✅ Emergency Detection & Rapid Response
- ✅ Crowd Monitoring & Management
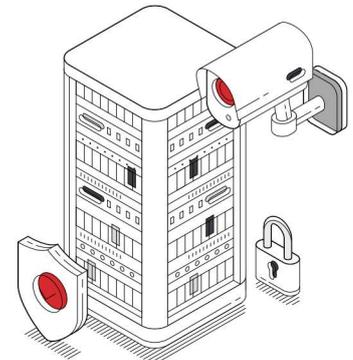

Transport Sector

Video Surveillance as a Service (VSaaS) is a cloud-based monitoring solution that enables transport operators to enhance safety, security & operational efficiency across vehicles, stations & infrastructure.

- ✅ Passenger Safety & Security Monitoring
- ✅ Traffic Flow & Congestion Management
- ✅ Vehicle & Fleet Monitoring

Powered by Shaurrya DTS

Video Surveillance-as-a-Service Use Cases
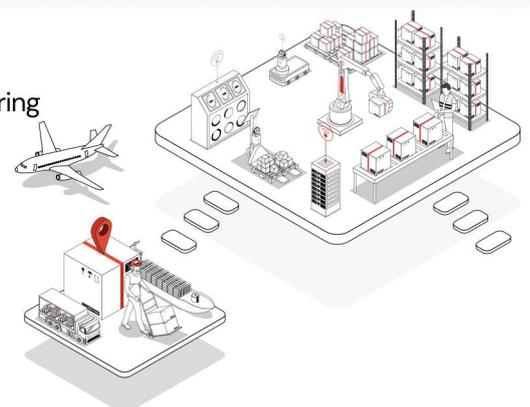

SHAURRYA
Teleservices

Petrol Station Sector

Video Surveillance as a Service (VSaaS) is a cloud-based monitoring solution that helps petrol stations enhance safety, security & operational efficiency by monitoring fuel pumps, staff, customers & facilities in real time.

- ✔ Forecourt Safety & Fueling Area Monitoring
- ✔ Theft, Drive-Off & Fraud Prevention
- ✔ Cash Counter & POS Monitoring
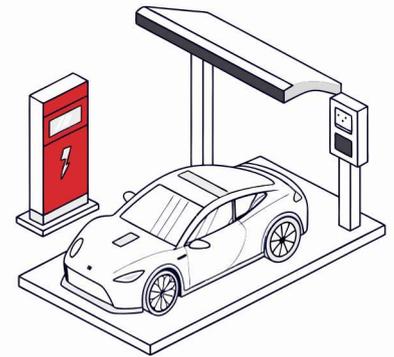

Road & Highway Sector

Video Surveillance as a Service (VSaaS) is a cloud-based monitoring solution that helps road & highway authorities enhance traffic management safety & operational efficiency through real-time & recorded video surveillance.

- ✔ Traffic Flow Monitoring
- ✔ Accident Detection & Emergency Response
- ✔ Traffic Violation Monitoring
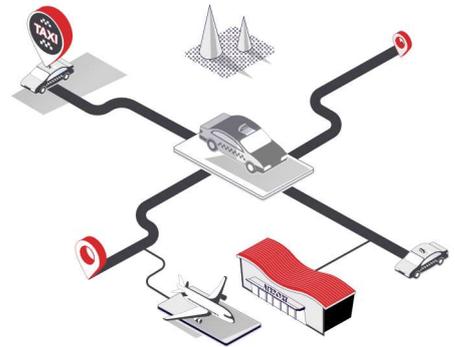

Restaurant Sector

Video Surveillance as a Service (VSaaS) is a cloud-based monitoring solution that helps restaurants improve safety, security, operational efficiency, & customer experience by monitoring staff, customers, & premises in real time.

- ✔ Theft & Fraud Prevention
- ✔ Staff & Customer Safety
- ✔ Kitchen & Food Safety Monitoring
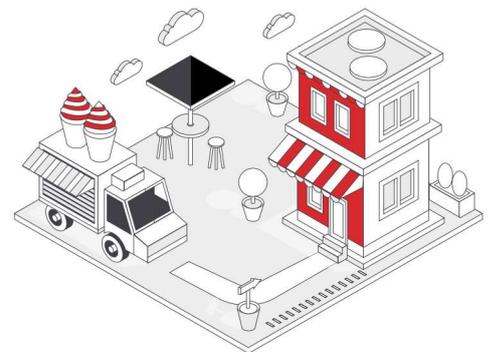

Construction Sector

Video Surveillance as a Service (VSaaS) is a cloud-based monitoring solution that helps construction sites enhance safety, security, & operational efficiency by monitoring workers, machinery, & materials in real time.

- ✔ Worker Safety & Monitoring
- ✔ Staff Safety & Workplace Security
- ✔ Access Control & Restricted Area Monitoring

Video Surveillance-as-a-Service Use Cases
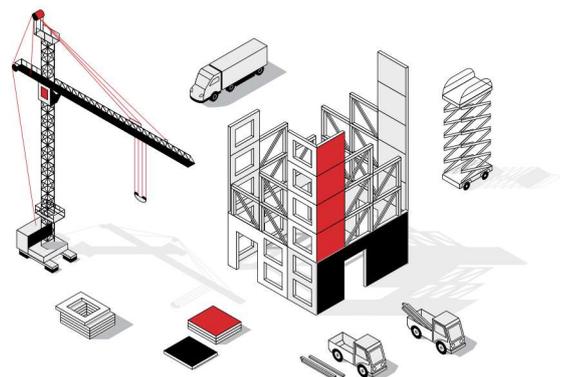

SHAURRYA
Teleservices

Pharma Sector

Video Surveillance as a Service (VSaaS) is a cloud-based monitoring solution that helps pharmaceutical facilities ensure safety, regulatory compliance, & operational efficiency by monitoring production, storage, & staff activities in real time.

- ✔ Production & Manufacturing Monitoring
- ✔ Production & Manufacturing Monitoring
- ✔ Warehouse & Inventory Security

Data Center Sector

Video Surveillance as a Service (VSaaS) is a cloud-based monitoring solution that helps data centers secure critical infrastructure, monitor operations, & maintain compliance through real-time & recorded video surveillance.

- ✔ Perimeter & Facility Security
- ✔ Access Control for Sensitive Areas
- ✔ Equipment & Asset Protection
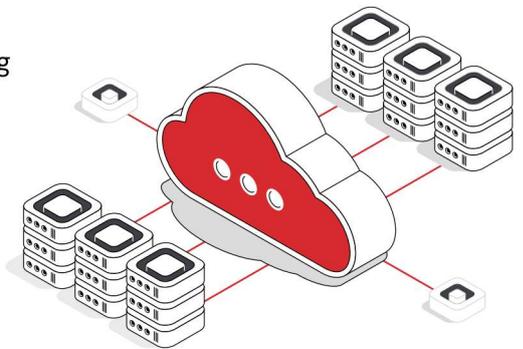

Airport Security Sector

Video Surveillance as a Service (VSaaS) is a cloud-based monitoring solution that helps airports enhance passenger safety, operational efficiency, & regulatory compliance through real-time & recorded video surveillance.

- ✔ Provides irrefutable evidence for claims or disputes.
- ✔ Reduces liability & legal costs.
- ✔ Supports transparent collaboration among stakeholders.

Hybrid Implementation

(Server to be installed as per the specs provided)

Item	Description	Subscription	Transfer Price (Taxes Extra)	SRP (Taxes Extra)
Stream OS [32 / 64 / 128 / 256]	• Connects up to 32 / 64 / 128 / 256 channels • Cloud VMS with Live & Playback • Admin Panel for device/user management • 1× Core Lite – Desktop application • 1× Core Multi – Desktop application • 5× Web View access • 5× Mobile App access (Android & iOS) • Device Health Check (Cameras/NVRs/HDD/SD Card etc.) • Reports & Dashboard • Logs & Audit Trail	**Capex (One Time)**	Call Sales	—
AI–Box	• Enables on-prem AI Analytics • Supports up to 16 credits • 3 year warranty	**Capex (One Time)**	Call Sales	—
AI Licenses	• All licenses for on-prem AI-Box • 16 credit license which can be used to enable any AI alerts/analytics • Refer to AI Analytics list for per channel credit utilization	**Capex (One Time)**	Call Sales	—

Annual Maintenance Cost (AMC) after 3 Yrs
