

# API Demo app

As part of the Remote Management API, we have included a Demo app that demonstrates all the available API calls. The APK is one of the CMSs available to be installed when provisioning a Stick in the Demo environment (see steps 1-4 in “Remote Management API Testing Preparation” pdf to prepare your stick with API capable firmware.

Once you’ve confirmed that firmware has been updated, follow steps to provision in <https://demo.signage.amazon.com/>. Select API Demo from the list of CMS providers.

[Signage manager](#) > [Signage Sticks](#) > Add Stick

Step 1

Enter pairing code

Step 2

**Choose CMS**

Step 3

Review and add

### Choose CMS

**CMS providers**  
Choose the content management System (CMS) that will control your signage display.
