

Multiply Output with an  
**Intelligent  
AI Workforce**

Scale operational output—not operational complexity—  
with AI orchestration built for cleaning and security.

## INTRODUCTION

# OPERATIONAL CAPACITY IS THE NEW COMPETITIVE **ADVANTAGE**

Cleaning and security companies can no longer scale effectively with manual processes. From labor spikes to retention risks, margin leakage and operational fatigue, the tight squeeze on margins are getting undeniably tighter across the board. To break through this operational ceiling, you don't just need better software. You need a way to gain lead time and move quickly.

By adding an AI-powered workforce to your business, you can stop fighting the daily operational fires. You empower your people to focus on the work that actually matters, while remaining firmly in control.

The truth is, **the only scalable way** to increase operational capacity without increasing headcount **AT THE SAME RATE IS AI.**

## SECTION 1

# CONNECT EVERY WORKFLOW WITH INTELLIGENT ORCHESTRATION

Most AI tools solve one isolated task at a time. One tool handles scheduling. Another handles routing. Another analyzes reports. The result is fragmented workflows, disconnected decisions, and more systems to manage.

**Orchestration changes that.**

WAlve™ acts as the intelligence layer coordinating every operational workflow across your business. Instead of operating independently, each AI skill works together in real time — sharing context, adapting to disruptions, and optimizing outcomes across overtime trends, compliance gaps, and analysis simultaneously.

# THAT MEANS:

Eliminating  
unbilled overtime.

Strengthening  
contract retention.

Optimizing labor  
lifecycle costs.

Predictable  
portfolio margins.

Instead of disconnected automation, you get  
**one continuously learning operational system.**

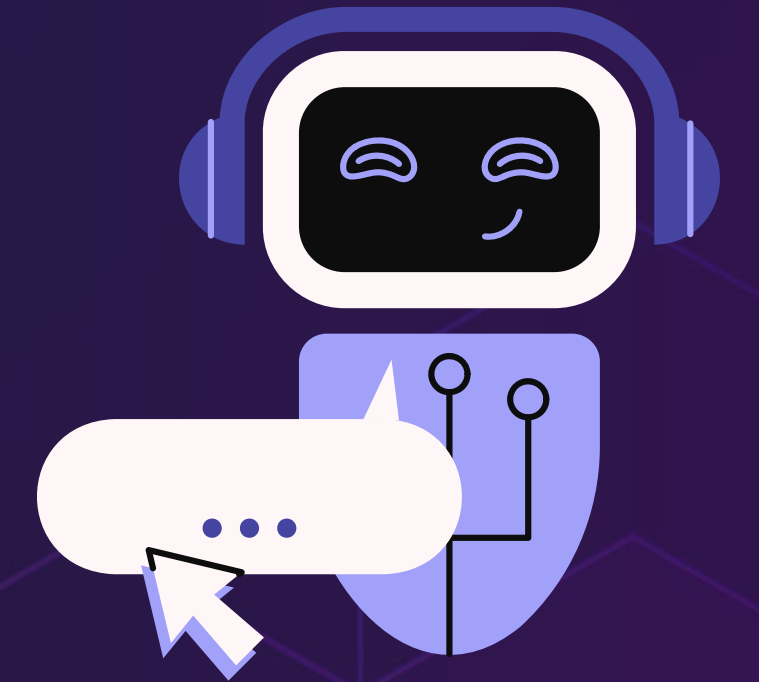

## SECTION 2

# WHAT IS THE **WAIVE™** ORCHESTRATOR?

WAlve™ is an intelligent AI workforce layer built directly into your WinTeam platform. It's not just a smarter piece of software. It is a dynamic system that actively runs your operation alongside your human team. This system, built on a foundation of rich industry data, delivers forward-looking recommendations that help to future-proof your business alongside your human team.

Behind the scenes, WAlve orchestrates an army of specialized digital skills—your new AI teammates. Each skill is an expert in its domain, from route density and scheduling to quoting and field operations.

You don't need to interact with a dozen different tools to realize business efficiency. You simply ask WAlve, and the orchestrator deploys the exact combination of expertise the task demands. WAlve automates routine tasks with built-in guardrails, continuously optimizing routes, preparing technicians before every job, and adapting in real-time when the day does not go to plan.

# WHY AN ORCHESTRATOR?

**Seamless integration:** It lives inside the CRM you already use. No duplicate data entry.

**Unified power:** Instead of fragmented tools, WAlve consolidates into one intelligent layer.

**Value-first execution:** We focus on the functional skills that drive immediate return on investment.

## SECTION 3

# SOLVING EVERYDAY PROBLEMS WITH **WAlve™** SKILLS

Manual data entry and administrative overload drain your profits. WAlve deploys specialized skills to solve these exact problems. Here is how your new AI teammates tackle the daily grind:

### WAlve™ Scheduling

**The Problem:** Building schedules takes hours. Last-minute call-outs, specific certification requirements, and individual employee preferences turn shift planning into a constant headache.

**The WAlve Skill:** Turns hours of scheduling into minutes. WAlve automatically integrates labor laws, site-specific requirements, and certifications into every schedule. It optimizes for team continuity and proximity, instantly filling shifts and adapting to disruptions 24/7.

### WAlve™ Analysis

**The Problem:** Finding actionable insights requires pulling complex reports, leaving you flying blind on true profitability.

**The WAlve Skill:** Puts intelligence at your fingertips. You can ask questions of your data in plain language and get instant, AI-generated insights surfaced directly from your dashboards. Turn raw operational data into proactive decisions immediately.

## SECTION 4

# WHAT INTELLIGENT ORCHESTRATION LOOKS LIKE IN THE REAL WORLD

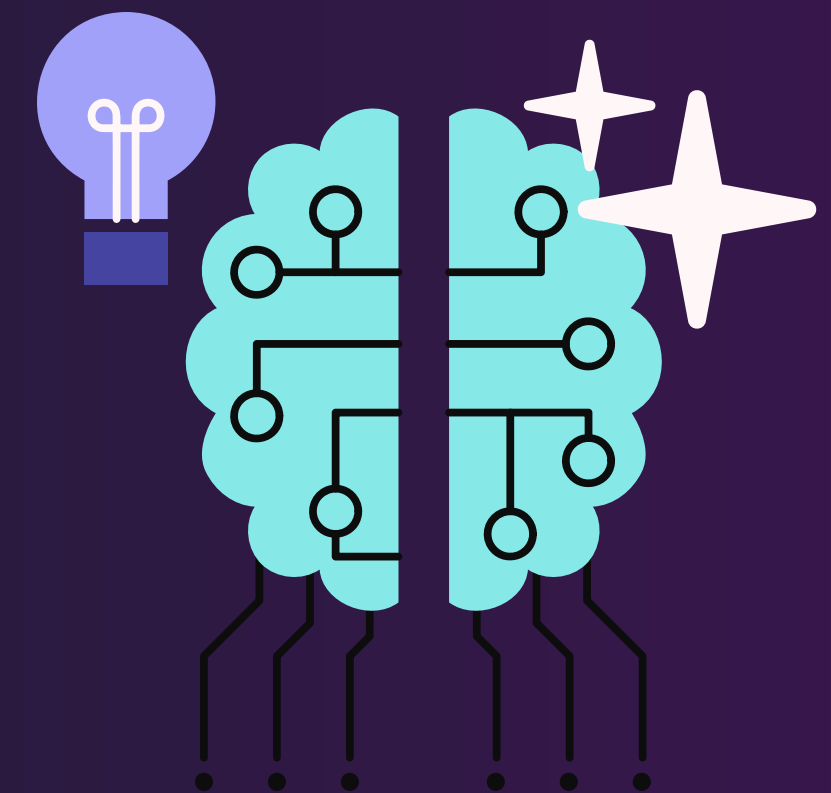

One callout. Zero confusion.

A member of your crew calls out sick at 6:30 AM.

# WAIVE:

- Adjusts schedules
- Rebalances routes
- Updates ETAs
- Identifies certification-compliant replacements
- Surfaces customer risk alerts
- Monitors revenue impact

—all **automatically.**

## SECTION 5

# THE **ROI** OF INTELLIGENT ORCHESTRATION

Adding WAlve teammates to your business is not just about adopting new technology. It is about driving measurable, hard-dollar outcomes. When you unite your operations under one intelligent orchestrator, the results speak for themselves.

- **Massive Time Savings:** WAlve Scheduling can build 300 shifts in just 60 seconds\*. This eliminates over 12 hours of manual administrative work every single week.
- **Rapid Insights:** WAlve Analysis answers questions in less than 5 minutes\*\*.
- **Maximum Output:** By cutting redundant tasks and streamlining common field actions, WAlve enables technicians to double their productivity while expediting the onboarding of new hires.
- **Enterprise-Grade Compliance:** For commercial operators, WAlve helps automate complex regulatory compliance natively, turning audit-ready documentation into a competitive moat rather than a liability.

\*WAlve™ Early Adopter

**RUN LEANER.  
MOVE FASTER.  
SCALE SMARTER.**

## CONCLUSION

Your people are your greatest asset. Do not waste their talent on manual scheduling, repetitive data entry, and putting out operational fires. The future of workforce management is not more software, it's intelligent orchestration powered by AI.

WAlve™ adds an intelligent AI workforce layer that multiplies what your team can do. Digital teammates handle the complexity in the background so your people can focus on service, growth, and revenue.

**It's time to run your operation differently  
—with WAlve™.**
