15 bright colours — and any other on request.

Calzado circular elastomeric polymer — encapsulated top layer.

Standard range — 15 colours

Colour	Binder
Beige 1001 PCE03	aromatic
Ochre 1002 PCE04	aromatic
Yellow 1018 PCE05	aromatic
Orange 2004 PCE06	aromatic
Standard red 3016 PCE07	aromatic
Bright red 3020 PCE08	**aliphatic**
Pink 3015 PCE09	**aliphatic**
Dark blue 5005 PCE10	aromatic
Sky blue 5015 PCE11	**aliphatic**
Bright green 6018 PCE12	aromatic
May green 6017 PCE13	aromatic
Pine green 6005 PCE14	aromatic
Brown 8024 PCE15	aromatic
Mid grey 7037 PCE16	**aliphatic**
Anthracite 7016 PCE17	aromatic

The four-digit numbers refer to an approximate RAL shade: encapsulated granules are a blend of particles and cannot match a RAL exactly. The four highlighted colours are laid with an aliphatic binder, which does not yellow or alter the colour of the granules; the other eleven with a standard aromatic binder.

Terraludis sample board — encapsulated granules, actual colours.

Calzado granules, made 100% from production offcuts, are multicoloured. The colour is obtained by multiple encapsulation, with UV protection on every colour.

Your own colour, from 40 m²

Other off-range colours exist, and any colour can be made to order from 40 m² of top layer (≈ 250 kg of granules), at a specific price. The binder is specified during the design study.

Floor graphics

Designs and shapes inlaid into the surface, floor games, markings.

3D modules

Moulded shapes — hemispheres, seats — in the colours of the surface.

Colours are indicative only. Physical samples available on request.
