

ST-2000 DECLINED SCREW HOPPER

Overview

The Armbruster ST-2000 is an all stainless steel screw auger with hopper for the receipt of half ton bins. The auger allows the controlled metering and distribution of fruit to a destemmer or sorting line with minimal damage to the fruit.

Key Features

- Brings fruit in with consistent speed
- Adjustable output from 1-10 t/h with VFD
- Easy handling (dump and go)
- Easy to clean
- Option for pre-dejuicing areas to be integrated into the machine

Equipment Details

- Made entirely of stainless steel 304
- Easily moved by forklift or wheels
- Set of stainless wheels, four lockable steering rollers
- **Includes adjustable frame - with a range of discharge height from 50" up to 96.5"**
