

**See inside every
single piece of fruit
without damaging it**

The cost of hidden defects

Cost of Claims

Hidden defects resulting in increased operational and financial losses.

Too much Guesswork

No actual data, resulting in operational inefficiency and inconsistent quality.

No Competitive Edge

No possibility to distinguish from others in the market.

We solve your problem

Using **MRI with AI**, we create a digital twin of every single fruit and detect internal defects within seconds – without cutting anything

Examples for internal defect detection

AVOCADO

Internal browning

WATERMELON

Maturation

MANGO

Anthracnose

and more...

The technology - AI powered MRI

● PIONEERING INDUSTRIAL MRI

First and only company worldwide to industrialize MRI

Full automation and customization

>95% accuracy, matching production throughputs

How Orbem impacts your business

Quality Consistency

Deliver consistent quality – in every single fruit.

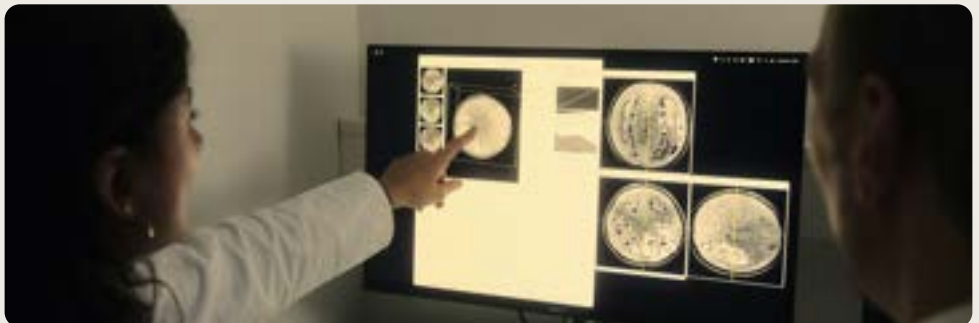

Smart Data – Better Decisions

Gain actual quality data and boost operational efficiency.

Competitive Advantage

Increase customer trust, secure larger contracts, and grow sales.

Orbem - the inside out company

Market-leading technology company - founded in 2019 in Germany, with offices in Munich and Houston, US.

200+ people working on unleashing AI-powered MRI.

More than 25 fully automated systems in production across Europe.

If you could see inside every single piece of fruit, what would it mean for your business?

What would be possible?
