

Certificate

Contribution to a resource-efficient Switzerland

The company

SMB Medical SA

has set a goal to improve the resource efficiency of its processes and products. Together with an expert from the Reffnet Advisory Program, measures have been identified to save material and energy, or to use environmentally friendly alternatives. These measures will now be implemented. The company is, thereby, contributing to a sustainable Swiss economy.

**Expected impact
of the measures**

1.58 Mia EIP
582.78 t CO₂

This corresponds to the
environmental impact of

1951 x Flight Zürich – New York (1 person)
68 Swiss citizens per year
313 t Primary steel produced

EIP stands for environmental impact points and summarises in one figure how large the environmental impact is. In addition to the climate impact, other impacts on the soil, air and water are considered.
