- **Positioning:** We remain disciplined bottom-up investors, evaluating the AI-driven benchmark leadership company by company on growth durability, competitive positioning, and valuation rather than theme exposure. The index is reconstituted fully in June to ensure accurate representation of the US mid cap growth style, with updates for parent index membership changes in December and quarterly IPO inclusions in March and September. Since March 24, 2025, the index applies quarterly capping if constituent weights exceed target RIC thresholds.

Investing involves risk. Principal loss is possible.

The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large-capitalization stocks or the stock market as a whole.

The Fund will invest in companies that appear to be growth-oriented. Growth companies are those that the Adviser believes will have revenue and earnings that grow faster than the economy as a whole, offering above-average prospects for capital appreciation and little or no emphasis on dividend income.
