

PRECAST CONCRETE

Introducing next-gen
construction technology

Coming Soon

Utility and drainage

U-shape drain and lid

Ideal for channeling surface water, it can also be used for laying cables and creating air ducts.

Egg-shape drain

The drain optimises flows and minimises sediment build-up, thereby improving rainwater management.

Box culvert

Placed under roads to divert stormwater efficiently, precast culverts are strong and can be easily installed.

Manhole chamber

The watertight chambers provide access to underground utilities and can withstand high compression.

Septic tank

Designed for sewage management, these airtight tanks are durable and low-maintenance.

Walls and facades

Compound & facade walls

Precast panels for walls are easy to assemble and offer a uniform, premium finish.

Jersey barrier

These safety panels for roads are impact-resistant and can be quickly repositioned.

L-shape retaining walls

The walls are a space-efficient way to hold back soil and prevent flooding along elevations.

Engineered wall product

Precision-molded for strength, they're ideal retaining walls, sound barriers and fences.

Landscaping & furnishing

Slab

Precast slabs can give pavements, flooring and walls an even finish and are easy to maintain.

Bench

Elegant yet sturdy, precast garden benches are weather-proof and need minimal upkeep.

Planter

Precast planters are more durable and can be designed to any specification.

Bespoke elements

Bollards, tree gratings, water bowls and more can be customised to match a project's aesthetics.

The Basant Betons advantage

Renowned for high-end paving and hardscaping products for nearly five decades, Basant Betons is now introducing premium precast concrete to India. Our superior-quality precast products will be manufactured in-house using imported technology, ensuring excellence at scale.

Imported technology

Advanced Japanese and German equipment help deliver the finest quality.

360° customisation

Dimensions, colours and textures can be tailored to your specifications.

Large capacity

Ideal for large-scale projects that require standardisation at high volumes.

Superior materials

From high-quality steel to aggregates, we use only the best in the industry.

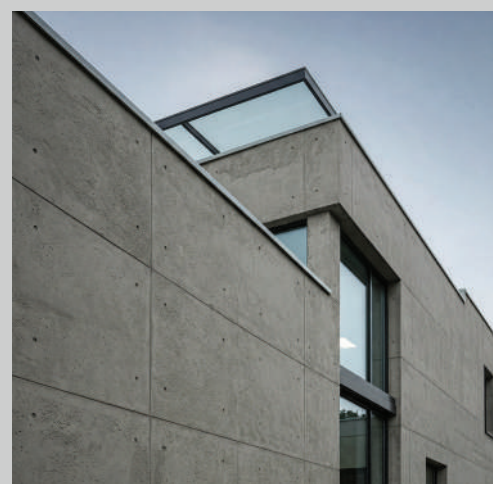

Durability

Premium materials and manufacturing in controlled environments boost longevity.

Eco-friendliness

Since the products are mixed in our factory, pollution and wastage at the site are minimised.
