

Introducing

MODULOCK

India's first **multi-notch**
large concrete paver
for heavy-traffic areas

ENGINEERED TO BE A NOTCH ABOVE

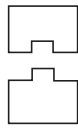

Modulock features 3x more notches than regular concrete pavers and combines larger dimensions with greater durability. A customised German design, it's brought to India exclusively by Basant Betons.

FEATURES

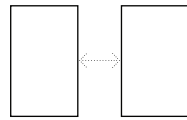

High load-bearing capacity

80mm thickness
withstands heavy
vehicular traffic

3x more notches

For strong interlocking
that minimises
displacement

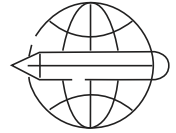

Increased spacing

Greatly reduces
friction between
pavers

Modular interlocking

Its two versatile shapes
can be combined
in different patterns

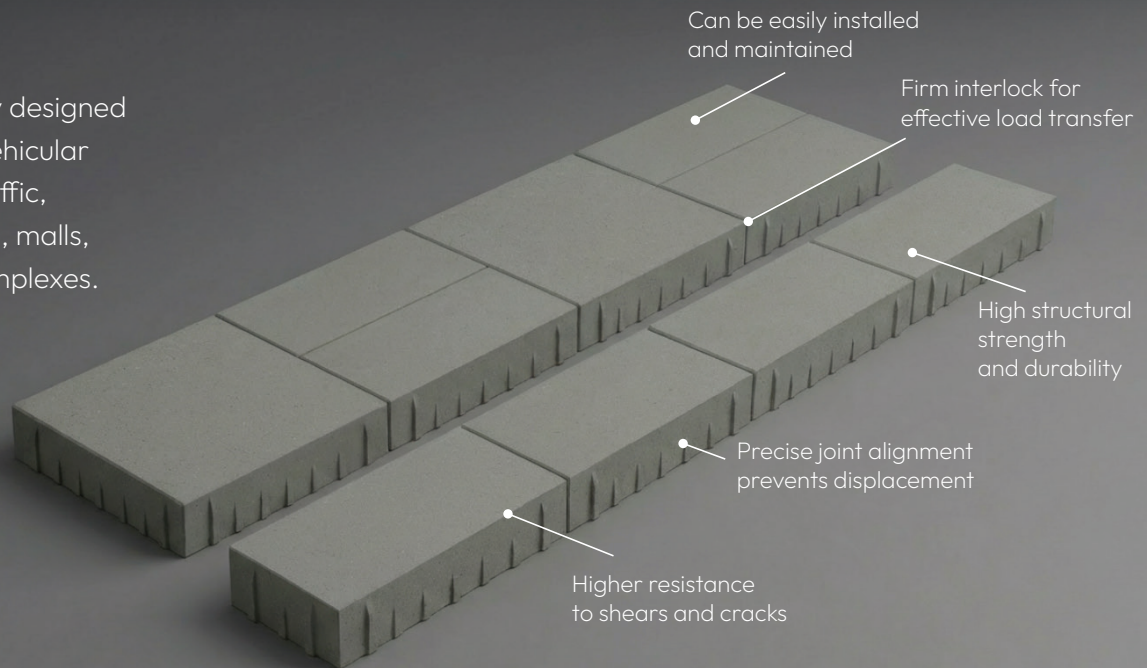

Customised German design

Delivers technical precision
and a consistent,
high-quality finish

Performance, perfected

Modulock has been specially designed
for projects with frequent vehicular
movement and high foot traffic,
such as factories, tech parks, malls,
hospitals and residential complexes.

Available variants

Modulock - S: 400 x 400 x 80 mm

Modulock - R: 400 x 200 x 80 mm

Colours and blended finishes can be customised to match project requirements.
