

Beautiful Pavers For Perfect Outdoors

► COLOR: WHITE, DARK PINK BLENDED

The Great Fifteen opens new perspectives for the creative design with the elegant, sleek & beautiful effect. These long stones enhance the architectural alignment for projects with clear structures. These stones come with two different surfaces, one of them being undulated for offering naturality.

TIVOLI™

► COLOR: LEMON YELLOW, PINK BLENDED

These flags when produced in colour-blends and bright colours show up palatial grandeur. Their bigger sizes naturally eliminates too many joints resulting in great appearance. They can also be produced in sober colours (earthen colours – where required) for old-world colour schemes.

► COLOR: WHITE, LIGHT BROWN BLENDED

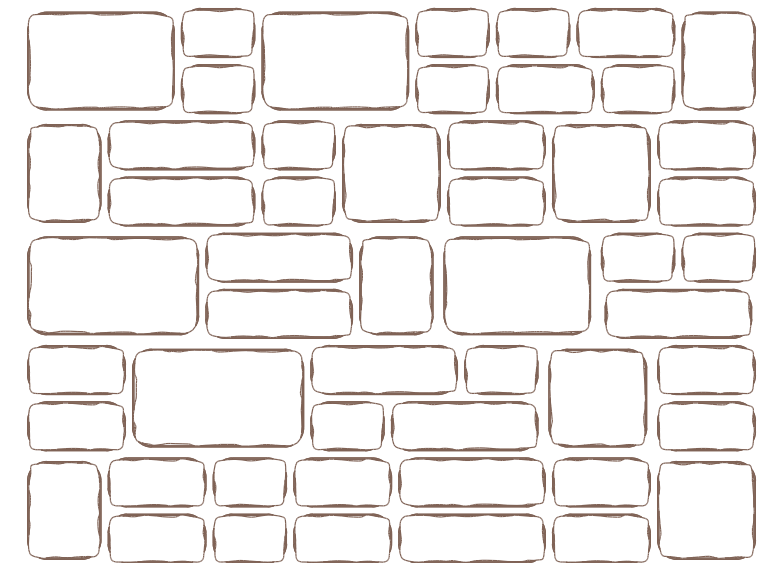

► COLOR: YELLOW, ORANGE BLENDED

These stones have uniform thickness and flat bottom, like normal concrete pavers, which facilitates easy laying. The joints when filled to the top completely disguise the uniformity in the lower half of the cobbles, thereby reflecting the natural cobble stones. These cobbles can be laid at random.

The Mediterranean Cobbles™

These good old cobble stones with the Roman touch and beauty are nostalgic and reflect the old world charm. These stones combine all the benefits of a modern concrete pavement and the classic-ancient-rustic beauty.

The Mediterranean Cobbles are indistinguishable from the natural ones as these have irregularly shaped edges, the gently undulating surface and natural colour shades. These are exceptionally durable and are therefore suited for heavy use such as access roads, courtyards, garden paths etc.
