

DEKKO

CONCRETE

Our mission is to revolutionize the way people experience and engage with concrete products. We are dedicated to providing lightweight concrete products that blend modern aesthetics with superior functionality, transforming ordinary spaces into extraordinary environments. We believe in the power of design and aim to inspire creativity and expression through our versatile lightweight concrete products.

Whether it's creating a warm and inviting atmosphere around a fire pit or enhancing the beauty of interior and exterior spaces with our wall panels, we strive to deliver exceptional craftsmanship that captivates and elevates every environment. Above all, we are passionate about creating spaces that evoke emotion, inspire connection, and stand the test of time.

We are driven by a relentless pursuit of excellence, continually pushing boundaries to redefine what is possible with concrete. Together with our customers, we are shaping a modern world where beauty, functionality, and sustainability converge in perfect harmony.

A man and a woman are in a desert setting. The man is sitting on a black chair, looking towards the woman. The woman is standing, holding a phone, and looking at the man. In the foreground, there is a large, white, spherical fire pit with a fire burning inside. The background shows a desert landscape with mountains and some vegetation. The scene is lit with warm, golden light, suggesting sunset or sunrise.

FIRE PIT

Collection

Dekko fire pits offer a convenient and simple way to achieve campfire ambiance at home. No chopping wood or cleaning up messy ashes. Just turn on one of our stunning, lightweight concrete fire pits and enjoy the warm glow with family and friends.

All Dekko fire pits ship complete with a convertible natural gas & propane burner, one decorative aggregate option, and a removable, chrome on/off key with adjustable flame control for manual. The only assembly required is a connection to the fuel source. Our unique lightweight concrete fire pits are less than half the weight of regular concrete making them easy to ship and install on any project including rooftops, patios and commercial applications. They are built to last and will endure the outdoor elements for years.

If you have a design or idea beyond what you see in our catalogue, we are happy to work with you. Dekko offers limitless customization possibilities.

ACCESSORIES

Fire Pit

TABLE TOP LID

When it comes to finding the perfect centerpiece for your outdoor lounging space, why choose between a fire pit or a table when you can have both? Our table top feature is a great way to have all the necessities of your outdoor entertainment centre without having to compromise space. The smooth aluminium surface will add a sleek, minimalistic touch while maintaining the strength and functionality to double as a serving and entertaining table. Consider it Dekko's way of enhancing your outdoor lounging experience — even when your fire pit is not in use!

TEMPERED GLASS WIND GUARD

Why let the wind spoil a good thing? Available for almost every fire pit, our tempered glass wind guard series is designed to keep the flame of your fire pit resilient against gusty weather and strong breezes. With a clear and sleek design you can enjoy the view of your fire pit even on windy days.

COMMERCIAL-GRADE WEATHER COVER

There is no better way to protect and preserve the original quality of your fire pit and its components than our all-seasons commercial-grade nylon weather cover. Custom designed and tailored to fit your fire pit, we recommend using a Dekko weather cover to preserve the longevity of your fire pit, when not in use.

LIQUID PROPANE TANK COVER

Available in each shade of Dekko's colour palette. Our propane tank covers will allow you to store your propane tank in a discrete, concrete encasement. The flat surface of your propane tank cover may additionally serve as an end table to complete your outdoor seating and entertainment area.

 42 LBS

COMMERCIAL EMERGENCY STOP

Perfect for commercial applications EI systems. Push button with keyed reset allows supervisor confirmation. Safely turns off up to 3 circuits plus one fail safe function.

2 HOUR ROTARY TIMER WITH NEMA ENCLOSURE

Stainless Steel Rotary Timers with a NEMA box. These fire pit timers are made to work in 2-hour increments, suitable for electronic ignition systems.

LP HOSE KIT (12'-0")

3/8" x 144" gas hose assembly and regulator

 WIND RESISTANT

INTERIOR CLADDING

Lightweight Interior concrete cladding is a versatile building material that offers architects and builders the flexibility to create aesthetically pleasing facades. The lightweight characteristics of the cladding alleviate the overall load on the framework, resulting in less strain on the foundation and supporting elements. This not only enhances the structural integrity of the building but also allows for the creation of taller structures without compromising stability. As a consequence, lightweight concrete cladding becomes an ideal choice for both new constructions and renovations, providing architects and builders with a solution that balances aesthetic appeal, energy efficiency, and structural efficiency.

EXTERIOR CLADDING

Lightweight concrete cladding stands out as a highly adaptable building material, providing architects and builders with the freedom to craft visually appealing facades while simultaneously mitigating the structural burden on the building. Beyond its aesthetic versatility, one notable advantage is its ease of installation, streamlining the construction process and reducing labor costs. This not only enhances efficiency but also makes it a preferred choice for both new projects and renovations.

Dekko exterior lightweight cladding exhibits remarkable resilience against various weather elements. It acts as a protective shield, withstanding the impact of rain, wind, and temperature fluctuations. This durability ensures a longer lifespan for the building envelope, minimizing maintenance requirements and associated costs over time. Architects and builders can confidently rely on lightweight concrete cladding to maintain its structural integrity and aesthetic appeal even in challenging environmental conditions.

The customizable nature of lightweight concrete cladding is another key benefit. Architects have the flexibility to tailor the cladding to specific design preferences. This versatility ensures that the cladding seamlessly integrates into diverse architectural styles, meeting the unique vision of each project. The ability to customize enhances the overall aesthetic quality of the building, contributing to its distinct character and visual appeal.

INSET DESIGNS

Custom concrete inset designs opens a whole new world of advantages for architects and designers, significantly enhancing the creative potential and functionality of commercial projects. In the context of logos and intricate designs, Dekkos custom lightweight cladding inset designs offer a canvas for architects and designers to integrate branding elements seamlessly into the space. Dekko cladding serves as a versatile medium, allowing for the incorporation of logos and intricate patterns without compromising the structural integrity or aesthetic coherence of the overall design. This integration of branding elements directly onto the cladding contributes to a cohesive and visually impactful commercial space, reinforcing brand identity and creating a distinctive architectural signature.

INSTALLATION VIDEOS

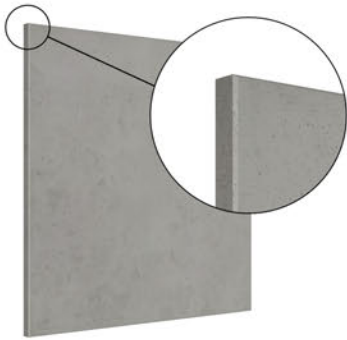

Concrete Cladding

Discover the simplicity of transforming your space with our lightweight concrete cladding. Dive into a hassle-free installation process with our extensive collection of step-by-step installation videos available on our website. Our user-friendly tutorials guide you through each stage, ensuring a seamless and successful application of our cutting-edge lightweight concrete cladding. Empower yourself with the knowledge and confidence to create stunning, modern environments that reflect your unique style. Explore the possibilities and bring your design vision to life with ease, thanks to our comprehensive installation support.
