DEKKO

CONCRETE

LIGHTWEIGHT FIRE PITS & CLADDING

R24

Our mission is to revolutionize the way people experience and engage with concrete products. We are dedicated to providing lightweight concrete products that blend modern aesthetics with superior functionality, transforming ordinary spaces into extraordinary environments. We believe in the power of design and aim to inspire creativity and expression through our versatile lightweight concrete products.

When creating a warm and inviting atmosphere around a fire pit enhancing the beauty of exterior spaces with our fire features, we strive to deliver exceptional craftsmanship that captivates and elevates every environment. We are passionate about creating fire pits that evoke emotion, inspire connection, and stand the test of time.

We are driven by a relentless pursuit of excellence, continually pushing boundaries to redefine what is possible with concrete. Together with our customers, we are shaping a modern world where beauty, functionality, and sustainability converge in perfect harmony.

FIRE PIT

Collection

Dekko fire pits offer a convenient and simple way to achieve campfire ambiance at home. No chopping wood or cleaning up messy ashes. Just turn on one of our stunning, lightweight concrete fire pits and enjoy the warm glow with family and friends.

All Dekko fire pits ship complete with a convertible natural gas & propane burner, one decorative aggregate option, and a removable, chrome on/off key with adjustable flame control for manual. The only assembly required is a connection to the fuel source. Our unique lightweight concrete fire pits are less than half the weight of traditionally poured concrete making them easy to ship and install on any project including rooftops, patios and commercial applications.

If you have a design or idea beyond what you see in our catalogue, we are happy to work with you. Dekko offers limitless customization possibilities.

ACCESSORIES

Fire Pit

TABLETOP LID

When it comes to finding the perfect centerpiece for your outdoor lounging space, why choose between a fire pit or a table where you can have both? Our tabletop feature is a great way to have all the necessities of your outdoor entertainment center without having to compromise space. The smooth aluminum surface will add a sleek, minimalistic touch while maintaining strength and functionality to double as a serving and entertaining table. Dekko's way of enhancing your outdoor lounging experience when your fire pit is not in use!

TEMPERED GLASS WIND GUARD

Why let the wind spoil a good thing? Available for almost every fire pit, our tempered glass wind guard series is designed to keep the flame of your fire pit resilient against gusty weather and strong breezes. With a clear and sleek design you can enjoy the view of your fire pit even on windy days. With the added effect of light reflections.

COMMERCIAL-GRADE WEATHER COVER

There is no better way to protect and preserve the original quality of your fire pit and its components than our all-season commercial-grade nylon weather cover. Custom designed and tailored to fit your fire pit, we recommend using a Dekko weather cover to preserve the longevity of your fire pit, when not in use.

LIQUID PROPANE TANK COVER

Available in each shade of Dekko's color palette. Our propane tank covers will allow you to store your propane tank in a discrete, concrete encasement. The flat surface of your propane tank cover may additionally serve as an end table to complete your outdoor seating and entertainment area.

42 LBS

COMMERCIAL EMERGENCY STOP

Perfect for commercial applications EI systems. Push button with keyed reset allows supervisor confirmation. Safely turns off up to 3 circuits plus one fail safe function.

Offers 65K BTU CSA/US Approved
Chrome Key to turn on/off – Manual Lighting

Electronic Ignition (EI)
Ranges from 90K – 150K BTU
Remote Control (on/off) can integrate with Smart Home Systems

Why is CSA/US Important?
CSA/US burner assembly signifies that the burner has been independently tested and certified to meet stringent safety and performance standards for operation in both Canada and the United States. Our inserts are tested to ANSI Z21.97/CSA 2.41-2014 Outdoor Decorative Gas Appliance for U.S. and Canada. For customers, this certification delivers confidence that the burner assembly complies with applicable codes, regulations, and inspection requirements, helping ensure smooth installation and faster approvals. It also reflects a high level of design integrity, reliability, and operational safety, reducing risk to personnel, equipment, and facilities. By selecting a CSA/US certified burner assembly, customers gain a dependable, compliant solution that protects their investment and supports long-term, trouble-free operation.

All Weather Use
Dekko Concrete Fire Pits are rigorously tested for fire, wet/dry, freeze/thaw durability and are rated for all climates, offering unmatched reliability and performance year-round. This means clients can enjoy their fire pit without worries, knowing it is designed to withstand extreme temperatures and weather conditions. Whether it is a scorching summer day or freezing winter night, our fire pits remain resilient and beautiful, ensuring lasing enjoyment and safety for your outdoor gathers. Choose our fire pit for peace of mind and exceptional quality in any climate.

Importance of UGO
A patented Universal Gas Orifice (UGO) allows natural gas (NG) and liquid propane (LP) conversion without changing parts or disassembling the appliance. It works across match-lit and electronic ignition systems. (UGO is a patented Universal Gas Orifice technology and is the intellectual property of HPC Fire Inspired™).

Fire Pit Specific Data Sheets
Please refer to the model-specific fire pit data sheets for detailed dimensional specifications, installation requirements, and performance information. Each fire pit model has unique attributes, and the corresponding data sheet should be consulted to ensure accurate selection and proper use. Reference (https://dekkoconcrete.com/fire-pits)
