

MOGLOW

Quick Start

1. Charge

Plug the power adapter into the back of MoGlow and then into a wall outlet. MoGlow could take up to 9 hours to charge. Once fully charged, the indicator light will remain solid green.

2. Secure to counter

Lift the suction lever and then lower it to activate the suction. On rough or porous surfaces, suction MoGlow to the sliding disc for added stability.

3. Adjust height

- a. Swing mirror to upper position.
- b. Lift mirror to your height.

4. Adjust ring light

Push dimmer knob to turn the LED ring light ON or OFF. Turn knob to the right to increase the brightness. MoGlow has auto shutoff after 20 minutes to conserve battery.

5. Adjust magnification

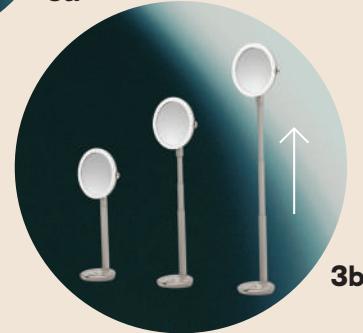

When the mirror is in the upper vertical position, use the flip knob to choose between 3x and 10x magnification.

6. Scan the QR code

Learn how to hang it on a door and much more!
