

When using third-party logos in newsletters, apply a safe area of 250×250 pixels to ensure sufficient space for proper display. The logo must not extend beyond this 250×250px area.

Optimal - Transparent

The preferred approach is to use monochrome versions within the 250×250px frame—black on light backgrounds and white on dark backgrounds.

Alternative - Circular container

If a logo must appear in full colour or does not have a monochrome variant, place it within a circular container (also 250 × 250 pixels).
