

Community School District 13

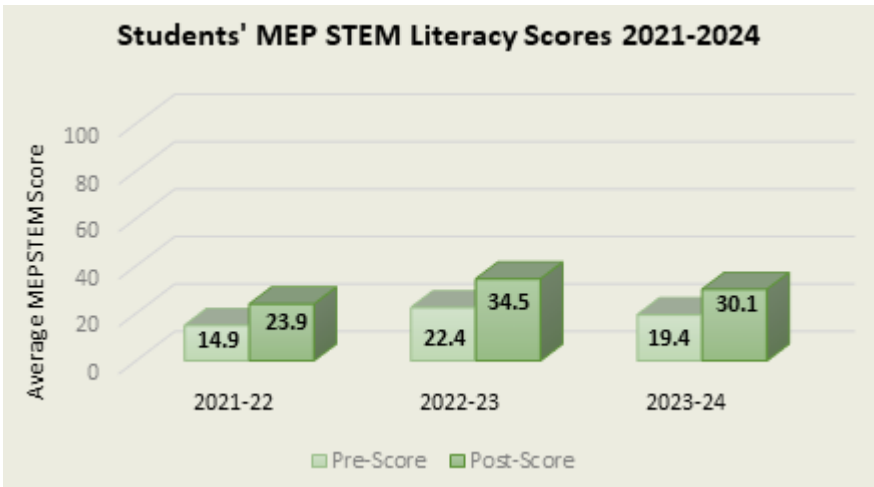

ACCELERATE A.H.E.A.D!

Enhances teachers' digital integration skills for math instruction. It has benefitted over 100 teachers and school leaders, along with over 500 students in 18 schools. The program elevates teachers' mathematical knowledge, fosters curriculum development, and boosts math outcomes. The program has advanced equitable STEM education, fostering a solid foundation for future academic and career paths.

Program Requirements:

- ✓ A cohort of teachers with a desire to integrate STEM into instruction
- ✓ Math and STEM Coaches to model instruction
- ✓ Funds for STEM Materials

How can this work in your school?

To replicate our program's success in another school:

- Identify math and science specialists to work with interested teachers.
- Share the detailed lessons and resources we offer on our [LTG site](#).
- Modify the lessons and resources for your school's personal learning goals.
- Implement in classrooms.
- Establish a feedback system for continuous improvement.
