- 1-House sizes and types
 - 2-Exterior finishes
 - 3-Roofing
 - 4-House color
 - 5-Driveway locations
 - 6-Garages
 - 7-Garbage disposal
-

1. House size and types

Houses and multi-family dwellings are broken up into 3 zones

Zone 1 – R2T Zoning

Lots 1-20 Block 9

Single family dwelling units **with** or **without** attached garages will be allowed in Zone 1

Minimum dwelling square footage is 950 sq ft (88.26m²)

Zone 2 – R2T Zoning

Lots 1-22 Block 8

Single family dwelling units **without** attached garages will be allowed in Zone 2

Minimum dwelling square footage is 1002 sq ft (93m²) per dwelling unit.

Zone 3 – R2T Zoning

Lots 1A/B – 7A/B Blk 7

Lots 1A/B – 7A/B Blk 10

Dulpex dwelling units **with** or **without** attached garages will be allowed in Zone 3
Minimum dwelling square footage is 1002 sq ft (93m²) per dwelling unit.

2. Exterior finishes

Zones 1, 2 and 3 will be required to provide a minimum of 2 exterior finishes on front elevation per dwelling unit. Any combination of Stucco, Siding, Masonry , Shingle(cedar, vinyl, hardi) and wider exterior trims.

If wider exterior trims are used they must be used on all windows and doors on front elevations. If shingles are used they must be used on all front elevation gables provided there are more than one.

3. Roofing

The main roof pitch including garage shall be a minimum of 4/12 pitch.

Asphalt roofing products are acceptable roofing finishes in stage 4.

Metal roofing will not be allowed in Southlands Stage 4.

4. House colors

Main color selection cannot be the same as directly neighbouring residences.

5. Driveway locations

Driveway locations on the front of the lot must be located as indicated on the lot guide.

6. Garages

Attached garages will be allowed in zones 1 & 2. Attached garages must follow lot guide for garage/driveway locations.

Detached garages must conform with Town of Warman bylaws.

7. Garbage disposal

As per Town of Warman bylaw 2007-09 "During the period of construction, it shall be the responsibility of the owner or the owner's agent, to arrange for a minimum 14 yard disposal bin to be located on site for the disposal of construction materials".

This bylaw pertains to each building site where a dwelling unit is under construction, and must be placed during the entire period of construction. The bin must be placed on site during the framing stage of construction.
