Simply select your preferred method of contact—email, call, or send us a message on Instagram—and our team will guide you to secure the best rates available. We're here to make your trailer purchase as smooth and affordable as possible.

TRAILER DESCRIPTION

The Tilt Car Trailer is purpose-built for anyone who needs to transport vehicles with confidence and ease. With a 3,200KG Aggregate Trailer Mass and a 2,200KG load capacity, this trailer is ready to haul cars, race vehicles, and low-clearance machines without breaking a sweat. The beavertail deck design makes loading and unloading low vehicles completely effortless, while the 16ft x 6.6ft perforated race deck provides exceptional grip and drainage in all conditions.

Built on an oversized fully-welded chassis with heavy cross supports, the Tilt Car Trailer is engineered for strength and longevity. The extended long drawbar and winch post give you greater control and versatility when positioning vehicles, while the slide-away underbody ramps ensure easy access every time. The front-mounted winch box with winch and battery makes solo loading simple and safe.

Safety is built into every detail – 4-wheel electric braking with a breakaway system, load-share greaseable suspension, and full ADR compliance ensure this trailer meets Australian Design Regulations, Safety Standards (AS), and the Motor Vehicle Standards Act 1989. Finished with custom LED lights and a 7-pin plug, the Tilt Car Trailer is the professional's choice for vehicle transport.
