What is unit status?

3 years ago · Updated

Follow

At MHub Showroom, we have 5 categories of booking status for each unit in the project.

- **Available:** Units that are live and available for purchasers' consideration
- **Reserved:** Unit has been reserved but booking fee payment has not been received
- **Booked:** Unit has been booked by purchaser. Booking fee payment officially received
- **Sold:** Loan has been approved and SPA signed
- **Delisted:** Units that are offline and placed on hold

This is the recommended sales cycle for each unit.

At Units, you may view the **Total Units** of the project at the top left-hand side. You may also click on the coloured blocks at the top to view the units in that category of booking status.
