

Inspection

Inspection of Herbicide Projects for Sudbury Forest

The Ontario **Ministry of Natural Resources (MNR)** invites you to inspect the planned herbicide projects for the 2026 season. As part of ongoing efforts to regenerate and protect Ontario's forests, selected stands on the **Sudbury Forest** (see map) will be sprayed with herbicide to control competing vegetation, starting on or about: **August 15, 2026.**

The project description and project plan for the herbicide project is available electronically for inspection by contacting the **Vermilion Forest Management Company Ltd.** during normal business hours and on the Natural Resources Information Portal at ontario.ca/ForestPlans beginning **July 15, 2026 until March 31, 2027** when the Annual Work Schedule expires. Please note, the **aerial herbicide operation** will be occurring in a specific area(s) of the **Sudbury Forest**, and not the entire management unit. Projects this year are in the townships of **Lampman, Frechette, McNamarra, Fraleck, Parkin, Hutton, and Morgan-Levack**. More detailed information on the location(s) of the activities within the **Sudbury Forest** can be viewed on the Natural Resources Information Portal at ontario.ca/8e098 or the **Vermilion Forest Management Company Ltd.** portal sudburyforest.com.

First Nation and Métis communities and interested and affected persons and organizations can arrange a virtual or in-person meeting with MNR staff to discuss the herbicide project. For more information, please contact:
