

Protecting Our Local Water Supply.

ZERO

Local Drinking Water
used for Cooling.
Not One Drop.

We've heard the concerns about water, and our commitment is clear: this project **will not** impact the residential water supply.

Our state-of-the-art system uses only reclaimed wastewater, sourced from the Greater Hazleton Joint Sewer Authority (GHJSA) and safely returned for treatment. The capacity improvements the project will fully fund will decrease residential sewer rates in the long term.

The Total Benefits Package

\$165M Direct Community Benefit

An unprecedented package for Hazle Township residents and our shared future.

- \$45M Direct Resident Grant Fund: Providing \$10,000 direct grants to eligible Hazle Township households.
- \$15M Community Support Fund: Supporting education, workforce training, arts, recreation, and local youth.
- \$105M Long-Term Commitment: \$7M annually for 15 years to support the Township's establishment of a local police department and reduce trash fees for residents.

Zero Local Drinking Water Used

Our cooling systems only use reclaimed wastewater, fully protecting the local water supply.

2,000+ Family-Sustaining Jobs

Creating 1,300+ construction jobs and 900+ permanent jobs, all offering family-sustaining wages.

1,100 Acres Conserved

For every 1 acre cleared, we are conserving 2 acres of local forest and open space.

*Responsible Development
Means Direct Partnership*

The Project Hazelnut Community Commitment

While Project Hazelnut is designed with individual care, it represents one unified commitment to our community.
