

Type less with Phrases

The text shortcuts you rely on in your EHR, now in Freed.

What it is

Phrases are customizable text shortcuts. For example, type `/pe` while editing your note in Freed and your full physical exam block drops in.

SUBJECTIVE

OBJECTIVE

Physical exam: Vitals stable, patient alert and in no acute distress.

Build your own

Templates → Phrases. No presets, no limit. Every phrase is one you wrote, in your words.

Pairs with dictation

Drop in a phrase to lay down the template, then dictate the specifics straight into the note.

Save minutes on every note

- `/normexam` Your normal physical exam template, ready to tweak.
- `/diabetes` Your standard diabetes counseling and follow-up plan.
- `/depression` PHQ-9 wording and the return-precautions you always give.
