PROFILE

UX/UI Designer specialising in complex, data-heavy web and mobile applications. I design structured, research-driven experiences that translate business requirements and technical constraints into intuitive, scalable solutions. Experienced in end-to-end product design within B2B and enterprise environments.

EXPERIENCE

ELEKS - Experience Designer - August 2023 - present

- Led end-to-end UX processes for complex web and mobile applications in data management and healthcare domains
- Designed information architecture and user flows for multi-role systems with advanced permissions and large datasets
- Conducted stakeholder workshops and usability validation sessions to reduce workflow complexity
- Created interactive prototypes and high-fidelity UI designs aligned with WCAG and scalability standards
- Collaborated closely with engineers and product managers in Agile environments
- Supported pre-sales activities by presenting UX strategy and product concepts to clients

Comarch S.A. - UX Designer - July 2022 - August 2023

- Designed web and mobile applications within loyalty marketing systems
- Developed user flows, wireframes, and prototypes for complex multi-module platforms
- Improved usability of existing features through audits and iterative redesign
- Worked closely with analysts and developers to ensure feasibility and smooth implementation

Perfectauto24 - Seller/Customer Service - May 2017 - March 2021

- Managed online sales platforms and customer communication
- Coordinated inventory systems and order processing
