

Clear + Brilliant Pre & Post Operative Instructions

Pre-Operative Instruction

- Do not wear make-up to appointment. If you do arrive to appointment with make-up you can remove it with our facial cleanser.
- Avoid sun exposure three days prior to procedure.
- You may purchase Lido/Tetracaine cream to apply to your face prior to arriving to your appointment

Post-Operative Instruction

- You may experience some redness and mild swelling but both may diminish in approximately 12 hours
- Over the next few days you may experience some itchiness or skin sensitivity (to touch or temp). Both are indication of the natural renewal process and typically dissipate a few days after treatment. Overall your face will feel “sandy like” and dry for a few days.
- Ice for the first 24 hours.
- Apply post Laser cream or any gentle moisturizing cream. Alexis MD Ultra Hydrating drops and healing cream are recommended.
