

Jessner Peel Pre & Post Operative Instructions

Pre Operative Instructions

- ALL make-up must be removed prior to each Jessner's Peel. We prefer that you remove make-up prior to your visit. If you do arrive with make-up you can remove it when you arrive.
- We will clean your face with acetone to degrease the skin.
- The peel solution is then applied, your skin may be pink in color. You will feel a tingling or slight burning sensation.

Post Operative Instructions

- Immediately after treatment your skin will be red and may darken.
- Sun block must be worn at all times
- 24 to 48 hours you may notice some drying and flaking, initially this dryness may appear cracked and shiny.
- The Lasair post peel cream should be used at this point to promote healing, keep skin supple and provide moisture.
- The most important thing to do during this phase is to keep moist and PLEASE do not , manually peel any skin.
- Cleanse twice daily with cetaphil cleanser.
