**What if your own collagen
was the secret to natural
and long-lasting beauty?**

Discover how JUVELOOK® & LENISNA® can be tailored to your individual collagen needs.

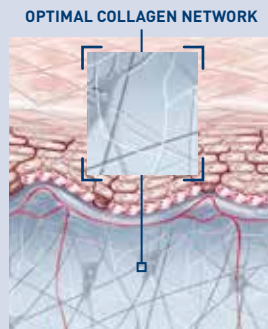

Your own collagen capital the secret for beautiful skin

Collagen makes up about **75%** of the skin and is one of **its main structural components**.

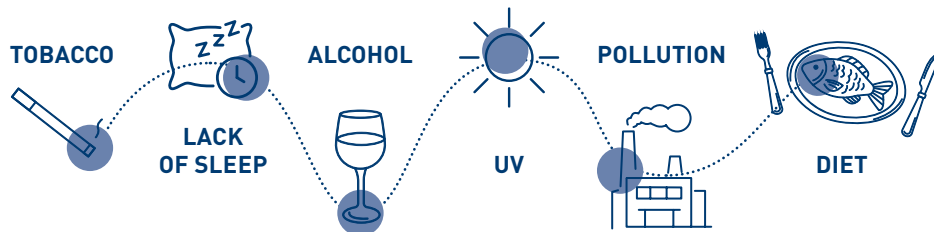

FULL COLLAGEN CAPITAL

Each of us has a **collagen capital**, which is a reserve of collagen.

When your collagen capital is full, the fibers are **dense, abundant, and well-organized**, forming a strong and flexible network that gives **the skin firmness, elasticity, and smoothness**.

Collagen capital peaks around the age of **25** and is then affected by **genetics, internal factors and external factors** including:

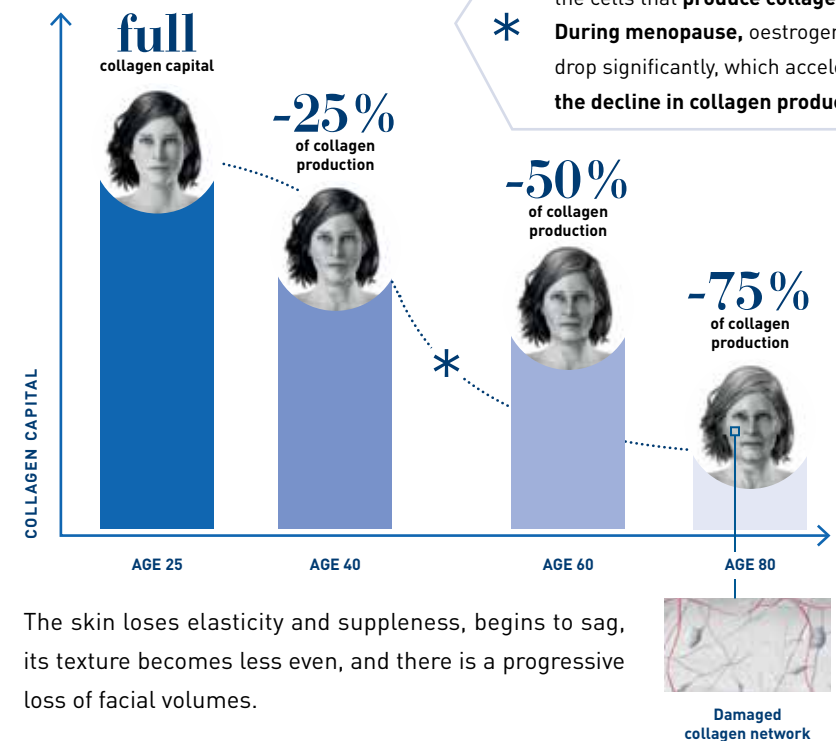

Your collagen capital slowly declines over time

From the age of **25**, collagen production begins to **slow down**, and at the same time there is an acceleration in the **breakdown of collagen fibers**.

Did you know?

Oestrogens play a key role in stimulating the cells that **produce collagen**.
* **During menopause**, oestrogen levels drop significantly, which accelerates the **decline in collagen production**.
