RE: A tribute to America on our birthday

Thank you all. Our team is made up of so many gifted people. We are worker bees, investors, advisors, consultants, cheerleaders, active military, veterans, retired mill workers, interns, elected officials, neighbors, former members of Congress, future members of Congress, CFOs in training, plant managers, innovators, neighbors, and friends.

It is worth remembering on this amazing birthday of our country the sacrifices that led us here. America was built by adventurers and risk takers, farmers, tradespeople, and small business owners. When problems arose, innovators and entrepreneurs began problem-solving. Today, we follow in their footsteps by creating a solution to remediate toxic chemicals using the healing remedies found in the forests of Maine's Great North Woods.

We took giant steps in the last month as our Engineered Carbon continues to capture PFAS in study after study. With near-complete datasets, we are finding that our products can filter PFAS from water, air, and gas. Reducing exposure to toxic chemicals will make our communities and neighbors, especially children, safer. Childhood leukemia is now linked to PFAS exposure.

Thank you all for being part of this amazing journey and for our combined talents and efforts to protect our friends and loved ones from PFAS.
