Looking to 2026 with Future Water

Our Mission

Future Water
Association

Informing, Innovating, Influencing

Since forming in 1986, Future Water Association has aimed to shape the future of our industry by informing, innovating and influencing.

We are the voice of the water sector, advocating with Government, industry, members, and the public.

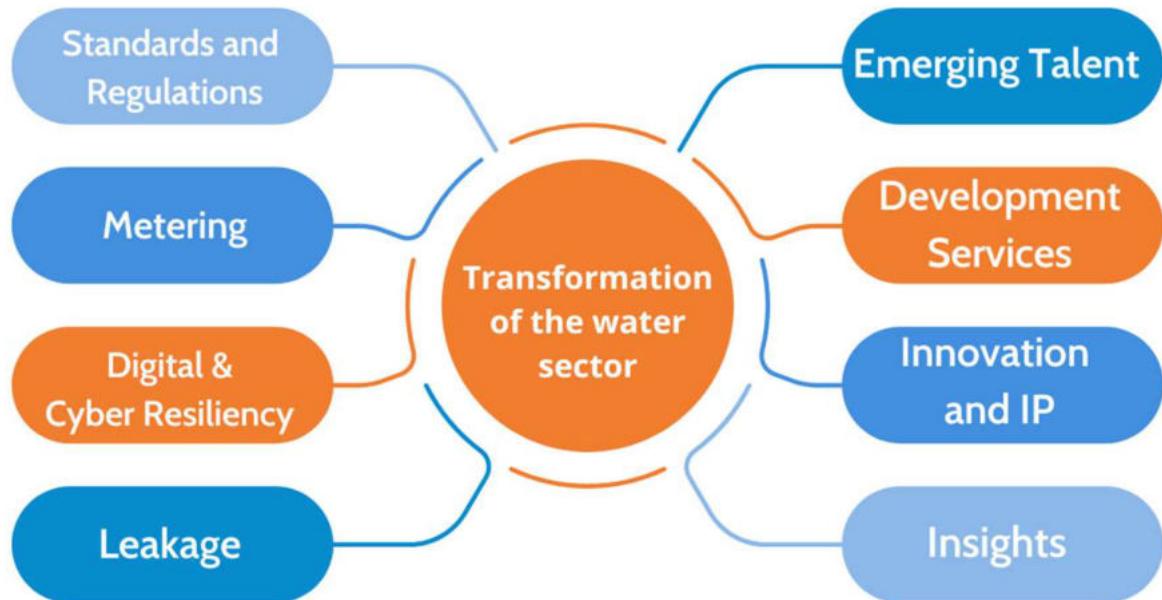

Through collaboration, innovation and honest dialogue, we can facilitate positive change in the UK water industry.

Our theme for 2025 is Transformation of the Water Sector.

Working Groups

Join our groups to drive best practice, share knowledge, network and transform the sector.

Each group meets quarterly.
