66 I left Bloomerang to try out Kindful, but their reporting and donor profile features just weren't as intuitive or fundraiser friendly as Bloomerang... I remembered how easy it was to build and customize reports in Bloomerang. The [support] chat feature with Bloomerang has come in handy when I was still learning how to build reports and use all of Bloomerang's features. Hands down, I recommend Bloomerang to other fundraisers every single time.
