

NEW FEATURES & ENHANCEMENTS

New features now in beta - explore, demonstrate, and position them with your customers.

01 Maintenance Mode

Schedule and suppress alerts during planned maintenance windows, cutting noise and preventing false-positive escalations.

For customers: *Cleaner alerting for customers running frequent maintenance.*

02 NCM Compliance

Config checks that validate device configurations against defined policies and flag deviations automatically.

For customers: A ready compliance story for regulated accounts.

03 Real User Monitoring (RUM)

Capture real-world end-user experience data - page load times, interactions, and errors - from production traffic.

For customers: Ties monitoring to end-user experience your customers care about.

04 Improved Reports

A refreshed reporting experience with clearer layouts, better filtering, and more actionable summaries.

For customers: Sharper reporting to reinforce value at renewals.

05 Nutanix Prism Central Support

Native integration for unified visibility into Nutanix environments alongside existing infrastructure.

For customers: Opens conversations with Nutanix-run accounts.

Let's position these together

Strong hooks for renewals, expansions, and new opportunities. We'll share talking points or join a customer conversation — just reply and we'll set up time.

Beta releases — functionality may evolve before GA; we welcome customer feedback. Cloudmon Partner Team
