

# DAREBIN HOUSING CAPACITY FRAMEWORK

Development of a capacity assessment framework and associated training to support Council planners in undertaking housing capacity analysis and prepare place-based development assumptions.

## WHAT WE DID

- Designed, delivered and facilitated a series of practical workshops to train strategic planners at Darebin City Council on the urban housing capacity assessment process.
- Coordinated and delivered an example dwelling capacity modelling workshop.
- Reviewed and refined their current municipal-wide capacity assumptions and methodologies.
- Created a suite of resources and tools that provide planners with guidance and step-by-step methodology on undertaking their own capacity assessments.
- Provided recommendations to improve capacity mapping, assumptions and reporting formats.
