

# MOIRA OPEN SPACE STRATEGY

A new framework to guide open space provision that supports liveability, wellbeing and sustainability across Moira Shire's towns and rural communities.

## WHAT WE DID

- Undertook a detailed background and policy review, aligning the Strategy with Council's Play Strategy, Recreation Strategy, Wellbeing for All Ages Strategy, Community Safety Strategy and Community Vision.
- Prepared a community needs analysis to understand how open space supports social connection, health, inclusion, recreation and environmental resilience across different age groups and communities.
- Completed best-practice benchmarking with comparable regional LGAs across Victoria and NSW to inform service standards and provision models.
- Delivered a technical open space inventory and spatial analysis, including typology classification, walkability catchments and access assessments.
- Designed and delivered a multi-layered engagement program, combining online and in-person engagement, targeted workshops and advisory group input.
- Prepared a Draft Open Space Strategy with a clear vision, strategic directions and township-specific actions.
- Graphically designed the draft Open Space Strategy and prepared illustrated maps.
