

14th European Conference on Tourette Syndrome & Tic Disorders

Lausanne, Switzerland | 9-11 June 2022

Oral presentations

Session I: **Friday 10 June, 4:45pm**

1. Feasibility of a Novel Virtual Tic Tool Kit Therapy Group (Owen Tamsin)
2. Automatic assessment of tic expression (Bar-Gad Izhar)
3. Prognosis of Rapid Onset Functional Tic-Like Behaviours: Prospective Follow-Up Over Six Months (Pringsheim Tamara)
4. A Formulation Driven Approach to Management of Functional Tics (Silva Juliana)
5. Family history of neurodevelopmental and mental health problems in children with functional tics (Harrold Katie)
6. Evaluation of a Psychoeducation Group for Children presenting with Functional Tics (Pearman Zoe)
7. Prevalence of mass social media-induced illness presented with Tourette-like behavior in Germany (Hackspiel Lisa Kathrin)

Session II: **Saturday 11 June, 2:30pm**

8. Online Exposure and Response Prevention for Children and Adolescents with Tourette Syndrome: A Randomized Controlled Trial (Andrén Per)
9. A randomized controlled trial comparing videoconference versus face-to-face delivery of behaviour therapy for youths with Tourette Syndrome in the time of Covid-19 (Prato Andriana)

10. Increased alpha-band connectivity during tic suppression in children with Tourette syndrome revealed by source electroencephalography analyses (Morand-Beaulieu Simon)
11. Functional connectivity during tic suppression predicts reductions in vocal tics following behavior therapy in children with Tourette syndrome (Morand-Beaulieu Simon)
12. The Tourette OCD Alberta Network: Development of a Continuing Professional Development Program for Community Based Mental Health Therapists (Fletcher Julian)
13. Speech and language disorders and complex vocal tics affecting speech fluency in people with Tourette syndrome (Nilles Christelle)
14. A voxel-based morphometry study of Provisional Tic Disorder with follow-up at diagnosis of Tourette syndrome (Black Kevin)
