

## Reflection 1

- 1. What course would you like to revise, and why? Please include course number and title as well as share what program(s) it's included within.**

I will be working to develop an integrated assignment that will be based in our culturally responsive pedagogy course (EDUC 6041 in the Secondary Cohort of the Urban Teaching Apprenticeship Program). The assignment will focus on supporting apprentices to cultivate culturally responsive classroom environments. Specific strategies for this will be taught in EDUC6041 and will be required to be used during enactments of disciplinary specific strategies in methods courses. The assignment will also require students to interact explicitly with the classroom mentors and coaches around their practice in this area.

- 2. Which CRSE competencies are (or are likely to be upon your revision) addressed in this course? This can be changed later.**

Primarily competencies 5, 7, & 8.

- 3. What do you hope to get out of this process? What benefits do you anticipate?**

I hope that students will experience a more coherent focus on classroom environment across the program. This effort should build a shared language across course and field instructors concerning what a culturally responsive classroom environment is and what practices support the development of such an environment.

- 4. What challenges do you anticipate?**

Coordination between multiple instructors, developing shared understandings will surface differences of opinion that will need to be negotiated.

- 5. How do you think your colleagues will respond? For example, will they be motivated, indifferent, or want to join you and revise their own syllabi?**

All are on board.

- 6. How will you include your colleagues in this project?**

This is being centered as a primary effort of the program faculty across the spring in order to prepare for fall implementation. Individual meetings with faculty will set the groundwork for faculty meeting conversations and feedback sessions as the assignment develops.
